

CEO & CTO (EN)

FELIX WAGNER
CEO & CO-FOUNDER

Felix Paul Wagner is CEO and Co-Founder of Circunomics. He leads the company's strategy and commercial development, focusing on building and scaling the B2B Battery Marketplace that enables batteries to be assessed, traded, and handled in a regulatory-compliant way across their lifecycle. Felix's background spans digital business and mobility. Prior to Circunomics, he built a solar venture in Australia and later worked in the automotive sector in Germany. At Circunomics, he works with industry partners across first-life and second-life segments to support structured battery trading and more transparent pricing through data and documentation.

JAN BORN
CTO & CO-FOUNDER

Jan Born is CTO and Co-Founder of Circunomics. He is responsible for the platform's technology and product development, including scalable architecture for marketplace operations, battery lifecycle analytics, and compliance / Battery Passport infrastructure. Jan brings 15+ years of experience in software development, cloud computing, and system architecture. He is also Co-Founder and Partner at Next Mobility Labs (venture studio). His focus at Circunomics is building robust, auditable data flows that support qualified listings and reliable transactions across different battery formats and use cases.
