

The world's leading intelligent battery lifecycle management solution.

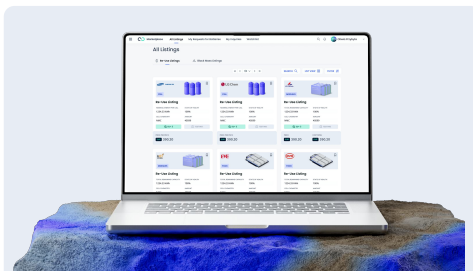

Our Ultimate Solution

ANALYTICS

Replacing guesswork with AI-powered, real-time battery monitoring in the field, combined with gateway diagnostics to assess suitability for second-life applications through remaining useful life (RUL) prediction

MARKETPLACE

We connect battery sellers and buyers across the entire battery value chain — from new cells, modules, and packs to second-life and end-of-life assets. Enabling seamless trading.

BATTERY PASSPORT

Our implemented battery passport is being complemented by comprehensive documentation within our centralized data management platform, enabling full transparency across the entire lifecycle

This is how we can help you:

💰 SCALE YOUR SALES IN EUROPE

Direct Access to Verified European Buyers

Our marketplace connects you instantly with a curated network of qualified B2B buyers across Europe — including EV manufacturers, energy storage system integrators, fleet operators, and industrial players — eliminating the need for costly local sales infrastructure.

📄 TAKING OVER EPR: YOUR COMPLIANCE SOLUTION

Partially taking over Extended Producer Responsibility (EPR) on behalf of battery producers -- our Compliance Solution handles most regulatory obligations and reporting duties to authorities, ensuring full compliance across markets.
