

Let's walk 4water.

We believe giving a child clean, accessible water is the best way to help change their future. By taking small actions like walking for water here in Canada you are *helping your students build empathy and raising awareness* for this critical need.

Want to make the Walk4Water even more meaningful for your students?

Here are some ways to engage your class in learning more about what a lack of clean water means for kids just like them.

"The Walk4Water was invaluable for my class! It was such a practical application for me to weave into my curriculum for Socials, Science, Health and PE!"

- Julie, Grade 3-5 Teacher
