

# Fixed Fee Implementation Services

## Accelerate first-time to value with a flawless implementation and onboarding experience

Your team partnered with People.ai to pave a path to better pipeline performance and revenue generation. Working with our professional services team can help you get down that path faster and further.

Our Fixed Fee Implementation Services offer an array of product deployment options designed to quickly prepare your environment and your teams to leverage People.ai technology. Entrusting the expertise of our consultants and project managers gives you a smooth, dependable deployment and onboarding experience – to your complete satisfaction, with no business disruption.

Each deployment option is available a la carte with clearly defined deliverables, timelines, and resources. This includes planning sessions with your teams to align product usage to key use cases and desired outcomes.

We also provide configuration assistance and enablement sessions for selected product capabilities to accelerate first time to value while priming your teams to deliver better pipeline performance and revenue growth.

### Key Service Benefits

Accelerate initial time to value by:

- Deploying People.ai into your environment – quick, error-free, and with a validated setup
- Seamlessly onboarding new users, shortening the onramp to improved GTM productivity
- Tapping into our training curriculum that's fueled by best practices cultivated from hundreds of customer deployments
- Working with a dedicated team of People.ai experts that enhance your knowledge and proficiency
- Getting an expansion-ready framework that scales, no matter what lies ahead
