Tactical Drone Operator Course - First Person View

Learn the Art of Tactical FPV Operations - from Simulator to Live Mission Execution in 5 Days.

First-Person View (FPV) drones are a transformative asset in modern tactical environments. T3i's 5-Day Tactical Drone Operator Course is an immersive training program designed to build lethal FPV operators from the ground up. This course provides the critical skills needed to effectively pilot, integrate, and employ FPV drones for One-Way-Attack (OWA) and sustained attack operations.

Through a structured curriculum that progresses from simulator fundamentals to live-flight and team-based strikes, participants will gain the confidence and competence required to operate under pressure and deliver decisive results.

Core Capabilities You Will Master:

- ✦ **Advanced Flight Control:** Execute precise maneuvers, from basic hovering to high-speed, low-level flight in complex environments.
- ✦ **Tactical Employment:** Learn munitions armament and employment methodology currently in use by adversary and partner forces.
- ✦ **Live Employment & Attack:** Coordinated attacks, including payload drops on target sets, and live one-way-attacks.
- ✦ **Team Integration:** Operate as part of a coordinated team, utilizing RF deconfliction, secure communications, and established tactical procedures.
- ✦ **Full Mission Profile Execution:** Plan, rehearse, and execute an end-to-end simulated combat mission in a dynamic field environment.

Who Should Attend:

- Military Personnel
- Law Enforcement Special Operations
- Government Agency Operators
- Security Professionals

Comprehensive Training Curriculum

Our curriculum is meticulously designed to build skills sequentially, ensuring operators master each phase before advancing. The blend of classroom theory, intensive simulation, and live-flight exercises provides a complete learning experience.

Upon successful completion of this course, operators will be able to:

- ⊗ Configure, check, and operate a complete tactical FPV equipment package.
- ⊗ Apply targeting and attack coordination principles for integrated operations.
- ⊗ Execute basic and advanced combat flight maneuvers with FPV drones.
- ⊗ Understand and employ ordnance for release/dropping, point-detonation, and remote-detonation.
- ⊗ Conduct independent team attack exercises from planning and infiltration to execution and exfiltration.
- ⊗ Participate in a full mission cycle, including OPOD review, team planning, and After Action Reviews.
