

Cyber-Forest Execution API™ — License Terms (Infrastructure)

Cyber-Forest Execution API™ is licensed as an infrastructure execution service. This license grants the right to invoke execution endpoints for post-event actions after business events are confirmed by the client system.

Permitted Use

- Execution of confirmed lifecycle and compliance events
- Integration via HTTP POST from client-controlled systems
- Use within the licensed tenant or organization only

Restrictions

- No resale or sublicensing without written consent
- No reverse engineering or replication
- No use as workflow orchestration or UI platform

Execution is performed strictly after client-confirmed events. Cyber-Forest does not validate or decide business logic.

Cyber-Forest™ — Legal & Intellectual Property Notice

All components of Cyber-Forest Execution API™, including execution logic, routing, architecture, audit mechanisms, and branding, are protected intellectual property of Cyber-Forest™.

No Software Transfer

Clients do not receive source code, compiled software, or ownership rights. Access is provided exclusively via controlled API endpoints.

Security & Data

No direct database access. No persistent personal data storage. No modification of client system state.

Cyber-Forest Execution API™ is fully detachable. Removal of the service does not affect client system operation.
