

CFS Execution — Pricing & Scope

CFS Execution is not a SaaS feature.

It is execution infrastructure that determines when and whether a system is allowed to act — with auditability, traceability, and responsibility.

Core Plans

Starter — €39 / month (€390 / year)

10,000 execution calls · shared execution pool · /execute1 endpoint · 7-day audit logs · community support.

Optimized for MVPs and low-risk environments.

Pro — €99 / month

50,000 execution calls · Stripe / Make / Zapier · custom sender config · 30-day audit logs · priority support · overage €0.002/call.

For live products with real operational responsibility.

Enterprise — €499 / month (€4,990 / year)

Dedicated execution worker · custom limits & routing (EU-only option) · custom audit retention · security & compliance review · contract billing.

Execution becomes part of your compliance perimeter.

Enterprise Bundles

Execution + Support — €5,990 / year

12 months · no auto-renewal · enterprise support · priority responses · operational & security guidance.

Execution + Support + Setup — €6,740 / year

Includes everything above plus setup & go-live verification, execute1 mapping and smoke test.

Optional Services

Setup & Go-Live — €750 (one-time)

Integration assistance · smoke test · production confirmation.

Setup + Support — €1,500

Setup & go-live plus 12 months of enterprise support.

Why This Pricing Exists

CFS Execution is a decision layer, not automation. Pricing reflects responsibility, auditability, and legal exposure. Cheap execution fails silently. Controlled execution does not.
