Documentation — Execution Layer & Compliance Infrastructure

Welcome to the official documentation hub of **LegalTech Counsellor by Inna Kragh**.

This platform provides execution-grade infrastructure for:

- eIDAS 2.0 & EUDI Wallet readiness
- Audit evidence pipelines
- Cross-border compliance workflows
- Contract + invoice automation
- Secure access and subscription control.

1. Core Modules

Billing & Subscription Access

Secure customer portal access via:

- Cloudflare Access (Zero Trust)
- Stripe Customer Portal Sessions
- Email-bound customer identity
- Audit logging

EUDI Gap Audit (Fast Track 24–48h)

A structured compliance assessment for:

- Wallet onboarding readiness
- Signature + authority attribution
- Evidence retention requirements

- Execution workflows across EU Member States

Deliverables:

- PDF Audit Report
- Risk & Priority Map
- Execution Recommendations

Execution Layer Architecture

Identity → Authority → Execution → Audit Evidence

Designed for:

- SaaS companies
- Trust providers
- Procurement-driven compliance
- Cross-border enforceability

2. Security & Audit Principles

- Zero Trust access by default
- No exposed customer identifiers
- Immutable audit evidence design
- GDPR-minimized processing
