

Enterprise Procurement Pack (RFP-ready)

Service Description

- Execution-only infrastructure.
- Stateless deterministic architecture.
- License validation required before action.

Security & Architecture

- Configuration-based sender identity.
- Structured execution audit logs.
- Sacred Zone exclusions for billing systems.

Risk & Governance

- Centralized kill-switch.
- Documented failure behavior.
- Clear responsibility matrix.

Data Protection

- Client = Data Controller; Provider = Technical Processor.
- No profiling or enrichment.
