Why choose Immerse Education?

Immerse Education delivers transformative, personalised educational experiences for ambitious students worldwide. Rooted in the academic traditions of Oxford and Cambridge, our programmes foster critical skills through curiosity-driven learning and tailored mentorship. Students deeply explore subjects in a supportive environment that encourages trial and error, helping them to develop a growth mindset.

Immerse prepares students for long-term success by leveraging global networks and providing hands-on experiences in inspiring learning locations. Participants gain confidence, discover new perspectives, and access future opportunities while excelling in their chosen fields.

The Immerse Experiential Learning Framework

Our unique learning model honed at Oxford and Cambridge and grounded in our 5 C's framework — Critical Thinking, Collaboration, Communication, Creativity, and Conscientiousness — delivers unmatched personalised learning experiences. Through expert-led small group sessions, we foster curiosity, celebrate trial and error, and instil a growth mindset that empowers every student to thrive through transformative learning.

Bridging ambition and knowledge, we equip learners to excel with robust skills in their chosen paths. Our methodology combines expert instruction with next-generation tools, and we go beyond traditional education by nurturing future-proof soft skills.

Studying Environment & Sustainability at Immerse

CAREER INSIGHTS:

Tokyo, San Francisco

Immerse Education's Environment & Sustainability programmes offer a profound and immersive learning experience for those passionate about societal issues and sustainability. These programmes are designed for ambitious participants looking to expand their understanding of global challenges, sustainable development, and environmental policies.

Led by experts and academics from top institutions, the course encourages thought-provoking discussions, group projects, and presentations that deepen participants' appreciation of environmental science and burgeoning sustainability concepts.

What we offer

Pathways

ACADEMIC INSIGHTS

Academic Insights programmes cater to secondary and high school students between 13 and 18 years old. They're ideal for students looking to gain a taste of life on campus as a student at a prestigious university before they apply, in the form of transformative and intellectually enriching experiences.

Students can expect to engage in stimulating lectures and seminars led by expert tutors and industry professionals, offering deep insights into their chosen subjects. Our curricula are thoughtfully designed to blend theoretical knowledge with practical applications, encouraging critical thinking and problem-solving skills.

CAREER INSIGHTS

Career Insights programmes cater to secondary and high school students between 15 and 18 years old. They're ideal for students in search of real-world industry experience from leading experts. Specifically tailored to prepare learners for their career paths, these programmes equip learners with the knowledge and skills required to excel in the workplace.

Each year, students walk away from the programme having found like-minded, ambitious, creative, and curious peers after developing transferable skills such as confidence, resilience, and the ability to communicate more efficiently.

Age groups

AGES 15–18

Locations

Our programmes run in a variety of historic and inspiring university locations that give students a true insight into living and studying like an undergraduate at world-leading institutions.

TOKYO

SAN FRANCISCO

Career Insights

Learning outcomes

Immerse Education's Career Insights Pathways programmes provide students with hands-on exposure to their chosen fields, laying the foundation for their future careers. Through practical workshops, mentorship from industry professionals, and real-world problem-solving, participants develop critical skills and gain valuable insight into their chosen industries.

Our programmes are rooted in our 5 C's: Critical Thinking, Collaboration, Communication, Creativity, and Conscientiousness. Students explore potential career paths while building confidence and networking with peers and experts, preparing them for future challenges and helping to shape informed and ambitious career goals.

Success stories

"The programme helped me prepare for university because it allowed me to get to know the course and the subjects that I would study. I now know the most important aspects that I need to work on to pursue my chosen career in Law."

Samuel, Career Insights participant who studied Law on our London programme.

"I've enjoyed meeting new people with Immerse, people who have different passions than I do and are studying different courses. I've learned so much in these two weeks and we've covered so many new topics that I hadn't heard of."

Gonzalo, Academic Insights participant who studied Computer Science on our Oxford programme.

"Passion may seem simple, but for me, it meant finding the answer to one of the most important questions in my life. It meant what career I would pursue, it meant what impact I would make on the world, it meant finding that fire that drives me, but most importantly it meant finding a part of me that I didn't know existed. This program strengthened and filled me with even more motivation to pursue medicine to make an impact in the world."

Khushi, Online Research Programme participant who studied Medicine.
