

CONTINUATION OF THE POLICY OF INVOLVING EXTRA-UNIVERSITY SPECIALISTS IN ARCHITECTURAL EDUCATION

On March 23, NUACA Faculty of Architecture organized a free professional lecture on the following topics: “Social Housing” and “Extension and Densification”, aimed at involving extra-university specialists in architectural education.

The mentioned topics were presented by architect-urban planner Heghine Pilosyan, who has studied at the Polytechnic Universities of Milan and Turin, Erasmus University Rotterdam, as well as worked in China, and Lebanese-Armenian architect, founder of “Sill and Sound Architects” architectural studio – Movses Ter-Gevorgyan (from Brussels), who has rich experience in the field of urban planning and restoration.

Such events are important for the exchange of experience of specialists, as well as for the acquisition of knowledge, and are considered ongoing steps in the policy of cooperation with extra-university specialists and their involvement in the field of architectural education.
