

CONVERGIX Automation Solutions

► Together, let's push what's possible.

Where people, process, and ingenuity converge.

The world's toughest automation challenges aren't solved alone. We're bringing together diverse automation experience and unifying an array of perspectives into smarter solutions — pushing what's possible for ourselves and our customers. At CONVERGIX, we confront complexity head-on, tackling problems that others avoid.

**One team.
Any challenge.**

The CONVERGIX Difference

The true strength of CONVERGIX is our people — the ones pushing what’s possible for our customers and the industry. We believe in collaborative problem-solving and a commitment to continuous learning, focusing on technical excellence, proven processes, and meaningful individual engagement. Rather than waiting for direction, we forge our own path and continually innovate — especially when established solutions fall short.

Our Industries

-  Life Sciences

Our Awards

Industries | Serving Critical Operations

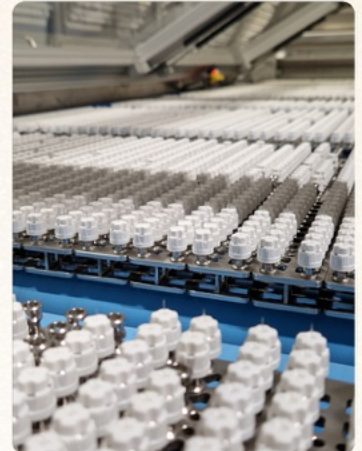

Our experienced team can evaluate your industrial operations from every angle, providing diverse perspectives that enable us to deliver tailored solutions across three primary sectors.

Life Sciences

We're shaping life sciences with cutting-edge automation solutions and expertise. We meet the highest industry standards, enhancing efficiency, precision, and reliability in:

- + Medical Devices
- + Medical Diagnostics
- + Pharmaceutical Automation

Our interventional device assembly systems deliver industry-leading accuracy, an integrated MES that combines precise capillary handling with automated folding, pressure testing, individual product laser engraving, and complete product traceability in a single comprehensive platform.

Industrial

Our integrated solutions enhance operations by automating spool handling, streamlining material movement, and improving assembly accuracy. We combine cutting-edge automation technology with specialized tooling into a seamless, intelligent workflow, capable of working with:

- + Automotive
- + Construction
- + EV & Advanced Mobility
- + General Industry
- + Heavy Duty/Recreational
- + Renewable Energy

CONVERGIX delivers advanced engineered systems for industrial applications. Our battery lines use high-speed robotic pick-and-place, magnetic conveyors, and integrated cell testing to drive precision and efficiency.

Consumer

We deliver advanced, custom solutions for manufacturing in the consumer industry — palletizing, assembly & packaging, and inspection/vision systems for:

- + Consumer Products
- + Food & Beverage
- + Logistics/Retail
- + Personal Care

CONVERGIX leverages extensive automation experience to help you minimize downtime, increase throughput, and ensure flexible systems with quick changeover times. By integrating comprehensive data-enabled information systems, you can enhance product quality and gain deeper insights into your production environment.

Capabilities | What We're Built to Do

Through our intelligent Automation Solutions, Controls & Digital Services, and seamlessly Integrated Technologies, we transform fragmented production lines into unified operations that deliver measurable gains in both precision and throughput. Our reliable, scalable systems are designed to optimize your current processes and prepare your operations for future manufacturing challenges.

Automation Solutions

From concept and design through build, installation, and ongoing support, we own the entire project lifecycle — ensuring seamless execution from start to finish.

- + Assembly
- + Feeder Solutions
- + Material Handling
- + Material Joining
- + Material Removal
- + Packaging
- + Palletizing

Controls & Digital Services

At CONVERGIX, our dedicated in-house team guarantees secure, real-time outcomes and empowers data-driven decisions for connected manufacturing operations:

- + **Automation & Controls Integration:** 30 years of experience ensuring safety, profitability, and sustainability through technology enablement
- + **Digital Integration:** MES/MOM and IIoT systems that connect sensors, equipment, and enterprise systems for complete visibility
- + **Network & Security:** Infrastructure design and cybersecurity solutions that bridge IT and plant floor operations securely

Our commitment to achieving increased efficiency and eliminating wasteful actions for customers requires a thoughtful digital transformation plan and flawless execution.

Integrated Technologies

CONVERGIX integrates automation systems to help manufacturers optimize operations, with solutions that work independently or together, like:

- + **AGV/AMR:** Autonomous vehicles replacing static material handling with dynamic, intelligent systems
- + **Robotics:** High-speed systems with precision controls handling complex assembly and material handling tasks
- + **Vision Systems:** Real-time inspection and guidance technology ensuring consistent quality and traceability

Process | How We Work

At CONVERGIX, we deliver consistent, dependable results that create measurable value for our customers.

01

Discover & Design

Our team collaborates with you to identify your unique challenges and develop solutions that meet your operational goals. We create detailed functional requirements and comprehensive concept designs, conducting proof-of-principle trials when needed to eliminate risks and validate feasibility.

02

Build & Validate

Your build team treats each system as a custom solution, emphasizing attention to detail and open communication during the manufacturing process. We conduct rigorous testing and invite you to witness a complete Factory Acceptance Test, validating system functionality and performance before shipment.

03

Install & Commission

Our certified technicians work closely with your team to ensure safe and efficient rigging and positioning of equipment. Our team presents the final specifications, guiding your operations team through system functionality to ensure alignment with your needs.

04

Support & Optimize

Our commitment extends beyond installation. We provide software updates, hardware maintenance, and prompt parts replacement. Our Project Management team clarifies the complexities of large-scale projects through effective and consistent communication.

Our Mission, Vision & Values

Mission

As one global company, we leverage the diverse and growing strengths of our team to transform our capabilities and processes from good to great — driving value for our customers through automation solutions.

Vision

To become the ultimate trusted partner, capable of solving any industrial automation challenge with our passionate people, world-renowned processes, and diverse experience.

Values

Integrity

Do the right thing, even if no one is watching. Act with uncompromising respect in everything we do. We are committed and act in good faith. Communication is transparent and encourages others to express opinions.

Excellence

Continuously improve and innovate. Strive for flawless execution and quality. Pursue the acquisition of new skills. Establish high expectations for self and others. Think and work across boundaries.

Passion

Approach the role with conviction. Bring out the best in others. Connect personal goals and objectives to overall company goals. Understand the company's impact on customers. Do not let failures stand in the way of achieving results.

We're ready to solve the next challenge.

What makes CONVERGIX powerful isn't just our scale or capabilities. It's what happens when they converge. Our professionals excel at transforming ambiguity into clarity and converting intricate systems into efficient solutions.
