

# CBOM Rules Report

temp-hybrid-migration-42ff.test:443    Generated: 2026-03-05T22:01:49Z

## Positives

- TLS 1.3 observed (TLSv1.3).
- No SHA-1 observed in negotiated cipher (TLS\_AES\_256\_GCM\_SHA384).

## Findings

**MED**    **TLS.KX.001**    [ASSET-1]

**Key agreement is classical-only**  
key\_share\_group=SECP256R1. Consider hybrid or PQC KEM groups where supported.

**LOW**    **HTTP.HDR.001**    [ASSET-12]

**Missing or weak HTTP security headers**  
Missing strict security headers: CSP, X-Frame-Options, Permissions-Policy.

**Next step: book a CipherScout internal deployment**  
Internal scanning extends coverage to your full cryptographic estate - APIs, source code, cloud KMS, device certificates, and more.
