CELSION | BANK

Trading

Trade digital assets 24/7, directly from your Celsion bank account.
One integrated platform for trading, custody and settlement.

Institutional Execution. Built to Scale.

Advanced order execution for professional needs. Efficient execution. Reduced market impact.

Deep Liquidity. Direct Access.

Direct access to institutional liquidity providers. Tight spreads, no intermediaries or FX markups.

Settlement Within the Bank.

Settle in CHF, EUR or USD without exchanges. Earn interest on fiat proceeds through call or fixed-term

Licensed Bank. Legal Clarity.

FMA-supervised, MiCAR-authorised Liechtenstein bank. Segregated digital asset custody.

Without Celsion Bank

Fragmented Setup.
Multiple Providers.

- Exchange
- Liquidity Provider
- Custody
- Payments

No single view. No verified control.

- **Venue fragmentation**
  Liquidity split-less efficient, harder to oversee
- **Custody breaks & wallet hops**
  Friction, delays and settlement risk
- **Prefunding locked**
  Capital tied up – not efficiently deployed
- **Manual reconciliation**
  Disconnected data across departments

CELSION | BANK

One banking partner.
One regulated environment.

Global Liquidity Network

Cash & Settlement – CHF | EUR | USD
Settled directly into your Celsion account

- **Integrated trading, custody and banking**
- **Full settlement visibility**
- **Account and portfolio statements, including all transactions**

What We're Building

Extending the Platform

Upcoming capabilities to expand trading, settlement flexibility and system connectivity within our regulated banking environment.

1. **Trading API**
   Connect your systems to market data, orders, balances and execution.
2. **Futures**
   Cash-settled BTC and ETH futures, subject to regulatory approval.
3. **Settlement Limits**
   Trade first, settle later: a trading line against assets held with Celsion.
   For corporate and institutional clients.
