
Microsoft Fabric Proof of Value

Overcome common data
challenges with our
Microsoft Fabric solutions

How can Microsoft Fabric Transform your data strategy?

Microsoft Fabric is an **all-in-one data platform** designed to integrate and simplify your data estate, enabling businesses to manage, analyse, and leverage data with greater efficiency.

It unifies powerful tools like **Power BI, Azure Synapse, and Azure Data Factory**, providing seamless access to data and insights across the entire organisation.

Why work with us?

At Blackbook.ai, Our expertise in AI, data management, and automation allows us to **craft strategies** that ensure your data platform is not only **secure and efficient** but also ready for the **future of AI**. We help you move from data complexity to clarity, driving **meaningful business results**.

What will our Discovery and Design Engagement deliver?

- 1 Educational Insights and Industry Use Cases**
Learn about the latest Microsoft Fabric innovations and how businesses like yours are leveraging the platform for success.
- 2 Current Platform Review**
Get an in-depth assessment of your existing data architecture to uncover inefficiencies and missed opportunities.
- 3 Costed Business Case for Delivery**
We provide a detailed, costed business case that outlines timelines, resources, and the ROI of your data modernisation journey.

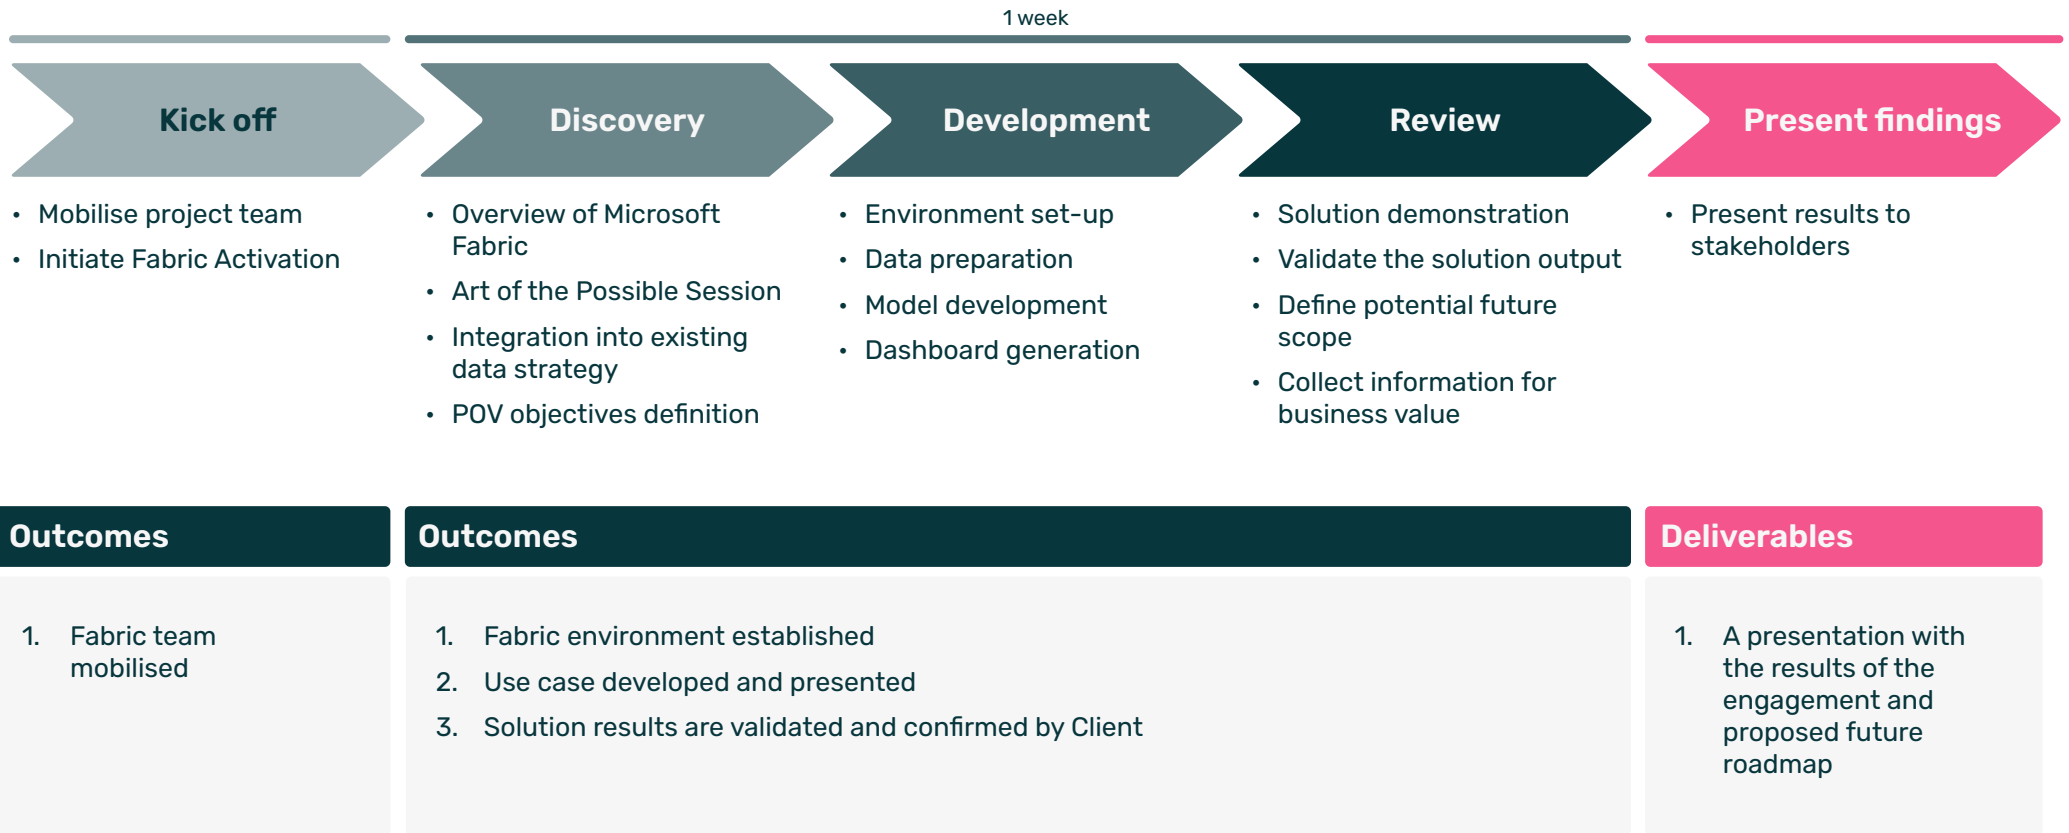

- 4 Business and Technical Stakeholder Workshops**
Collaborate with our experts to align goals, identify pain points, and explore opportunities for data-driven innovation.
- 5 To-Be Architecture Design**
Our CISSP-certified specialists design a future-proof architecture, ensuring your data platform is secure, scalable, and optimised for AI-driven outcomes.

Unlock the full potential of your data and **accelerate your journey** to AI-driven insights.

Delivery Approach

A **collaborative** delivery approach to demonstrate Microsoft Fabric capabilities

Total expected duration – up to 2 weeks

Project Team

The table below describes the different **roles and responsibilities** of the project team involved, along with the expected time commitment per role.

Role	Time Commitment	Organisation	Description
Key Business Stakeholders	Part time	Client	These could be department leads or end-users who will benefit from the insights generated by Microsoft Fabric. They provide input on specific use cases and review results .
Project Manager	Part time	Blackbook	Overall day-to-day management , project plan, tasks, timelines and communication plan.
Solution Architect	Part time	Blackbook	Designs the overall architecture , ensuring Microsoft Fabric aligns with the client's current data infrastructure and business objectives.
Data Engineer / BI Specialist	Full time	Blackbook	Responsible for data integration, preparation, and transformation, ensuring the right data is available for analysis within the Microsoft Fabric environment. Develops dashboards, reports, and visualisations to showcase insights from the data and demonstrate business value.
Executive Sponsor	Part time	Client	The executive sponsor may be a CIO or CFO etc. who is typically involved in the initial project inception and has the final say on project sign-off, but is not involved in the project delivery on an ongoing basis.
