

## Structural Drafting Technician

### Company Overview

Kerkhoff Engineering Ltd. has been providing structural consulting services since 2004. With over 20 years of industry experience, we specialize in complete precast and tilt-up concrete building systems. Working closely with our clients across Western Canada, our diverse team delivers comprehensive design solutions from preliminary 3D renderings and BIM modeling to complete building design, structural steel and precast panel shop drawings.

As the precast industry grows, we seek passionate professionals who are eager to develop their careers, expand their skills, and contribute to our shared success.

### Position Summary

As a Structural Drafting Technician, you will prepare accurate structural drawings and models for a variety of commercial and industrial building projects. Working alongside engineers and other drafters, you will play a key role in transforming design concepts into clear, constructible documentation using Revit and other drafting tools.

This is an exciting opportunity for a result-driven professional who values innovation, collaboration, and high standards of design excellence.

### Educational and Professional Requirements:

- Architectural Drafting Technician Certificate from UFV, BCIT, or equivalent
- Proficiency in Revit is required
- Bluebeam and MS Office experience is an asset
- Understanding of structural systems (steel, wood, and concrete) and construction terminology
- Ability to read and interpret structural and architectural drawings
- Effective communicator with the ability to work both independently and as a team
- Previous experience with precast concrete or structural drafting is an asset

### Personal Requirements:

- Strong attention to detail
- Strong verbal and written communication skills in English
- Valid BC drivers license and access to a reliable personal vehicle

**Key Responsibilities:**

- Develop detailed structural drawings and models using Revit and other drafting tools
- Interpret engineering markups and specifications to produce accurate shop and construction drawings
- Coordinate with team to ensure design intent and constructability
- Ensure all drawings comply with local building codes, standards, and project specifications

**Compensation:**

- Hourly rate \$25 - \$38, depending on experience

**Benefits:**

- Competitive wage with an annual fixed rate of increase based on experience and performance
- Comprehensive extended health benefits package
- Company funded professional development opportunities
- Collaborative and supportive work environment
- Regular team perks and referral bonuses

If you are interested in contributing to innovative structural solutions and building a rewarding career in engineering, please submit your resume and a cover letter in person or by email to [info@kerkhoffeng.ca](mailto:info@kerkhoffeng.ca). Only short-listed candidates will be contacted.
