

JENSEN HUANG · NVIDIA

Who gets to use the intelligence?

Powerful equipment is only a beginning. Access becomes capability when people have the skills, resources and freedom to use it well.

EDITORIAL INTELLIGENCE · 01

A commitment begins the test.

Resources promised are not outcomes delivered. Follow the path from intention to access, actual use and useful scientific work.

EDITORIAL INTELLIGENCE · 02

Design the whole working system.

Compute depends on networks, storage, power, cooling and people. Test the complete workload before celebrating the most impressive component.

EDITORIAL INTELLIGENCE · 03

Electricity makes the impact local.

Infrastructure has a location, a connection and neighbours. Assess total demand alongside efficiency, and identify who funds and governs the system.

EDITORIAL INTELLIGENCE · 04

Keep institutional choice.

Fund the people. Test the workload. Price the exit. A useful partnership should strengthen capability without making future choices invisible.

EDITORIAL INTELLIGENCE · 05

Measure the power to act.

The 2027 test is useful research, fair access and retained institutional agency. Possession of powerful equipment is not the same as independent capability.

Research, context and editorial responsibility

Who Gets to Use the Intelligence We Are Building?

Research cut-off: 11 October 2026. Visual edition revised 13 October 2026. Kelly Dowd, MBA, MA. Public-source analysis, not a WTM interview or endorsement.

[1] NVIDIA commitments for US science · 8 October 2026. Corporate announcement; no independent evidence of disbursement or realised research impact.

[2] NVIDIA Vera Rubin platform announcement · 16 March 2026. Vendor description. Availability and performance claims are conditional; no WTM benchmark testing.

[3] IEA Energy and AI executive summary · 10 April 2025. All data centres, not NVIDIA or AI alone. 2030 is a scenario projection, not observed consumption.

WTM Visual Intelligence · Noir Spider Atelier. Illustrative figures; not portraits of the named executives or records of actual company events. Refer to the full editorial for context and qualifications.
