

Your AI-powered sales productivity partner

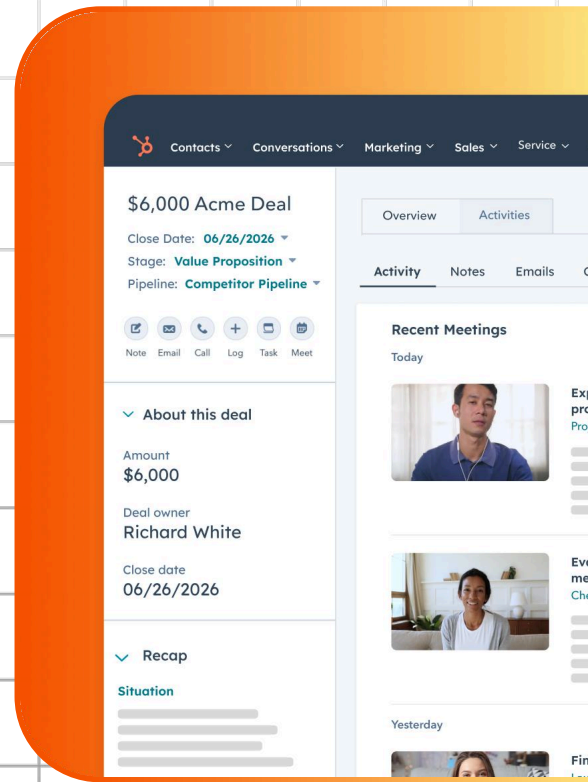

Fathom is an **AI meeting assistant** that automatically records, transcribes, and summarizes your customer calls – freeing sellers from notetaking so they **can focus fully on the conversation**. With instant insights and CRM-ready outputs, Fathom helps sales teams move faster, close more deals, and deliver a consistently high-quality buyer experience.

What you can do with Fathom

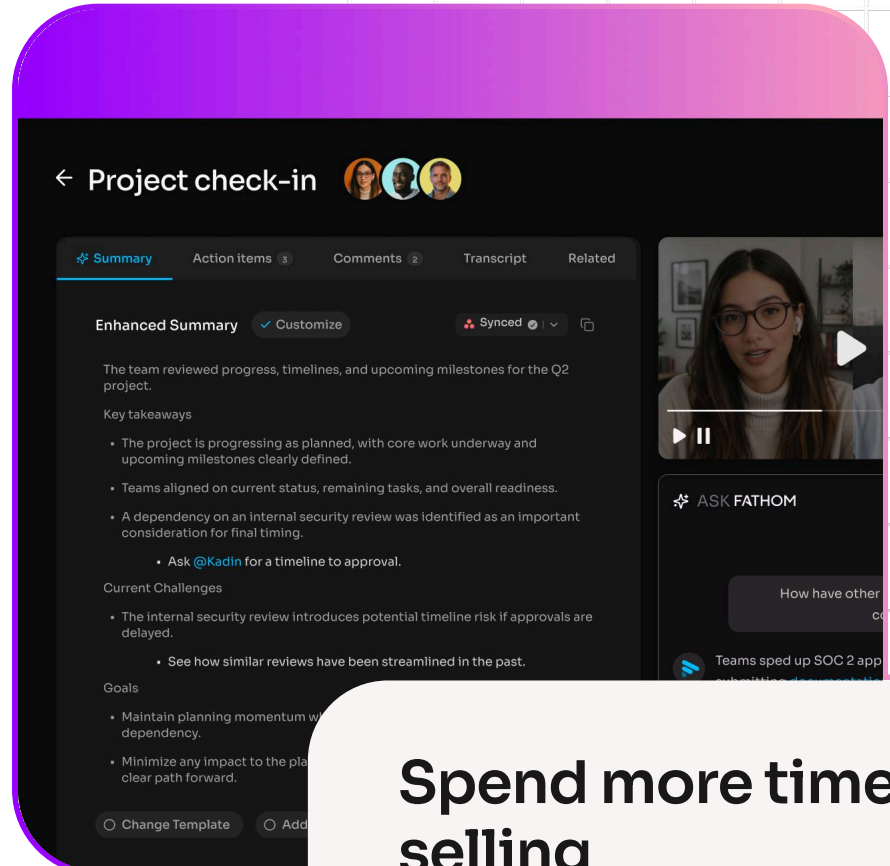

Improve deal execution & forecast accuracy

Structured recaps and next-steps summaries are available instantly after calls, with seamless CRM syncing (HubSpot, Salesforce, and more) reducing admin time and improving data hygiene, while consistent, high-quality deal notes help sales managers coach more effectively.

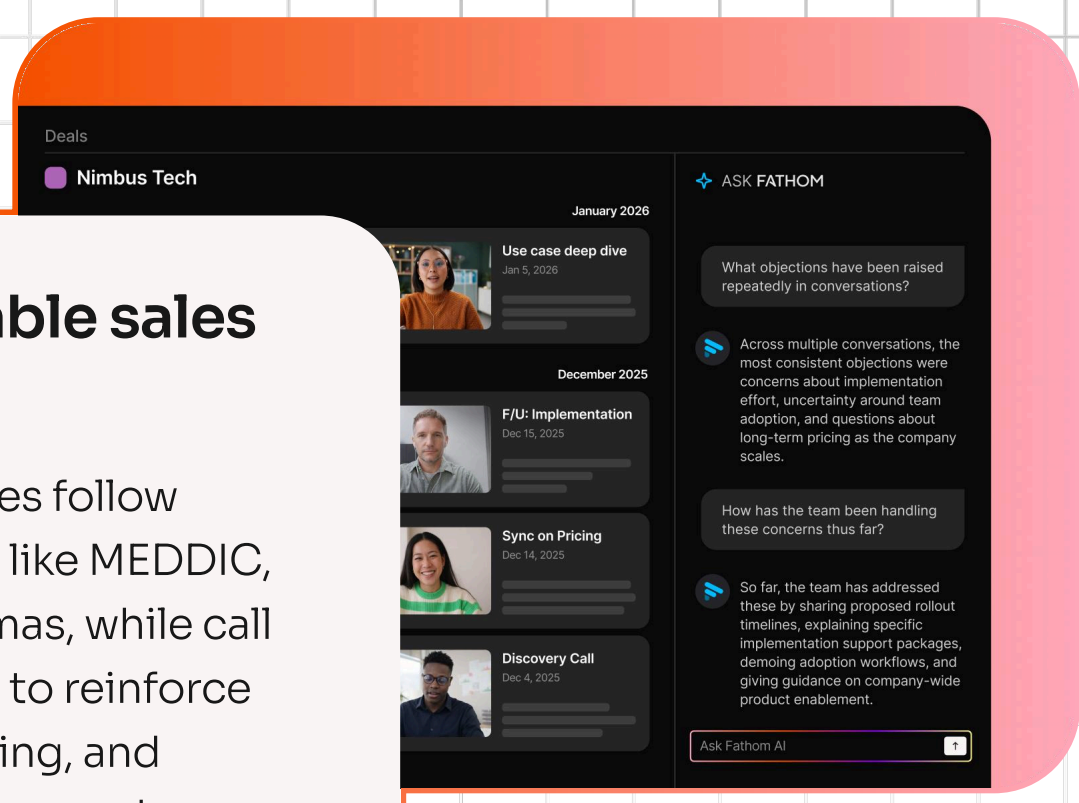

Spend more time selling

No more manual notetaking during calls: get real-time AI summaries delivered immediately after every meeting, with key moments automatically highlighted, including objections, competitor mentions, pricing questions, and next steps.

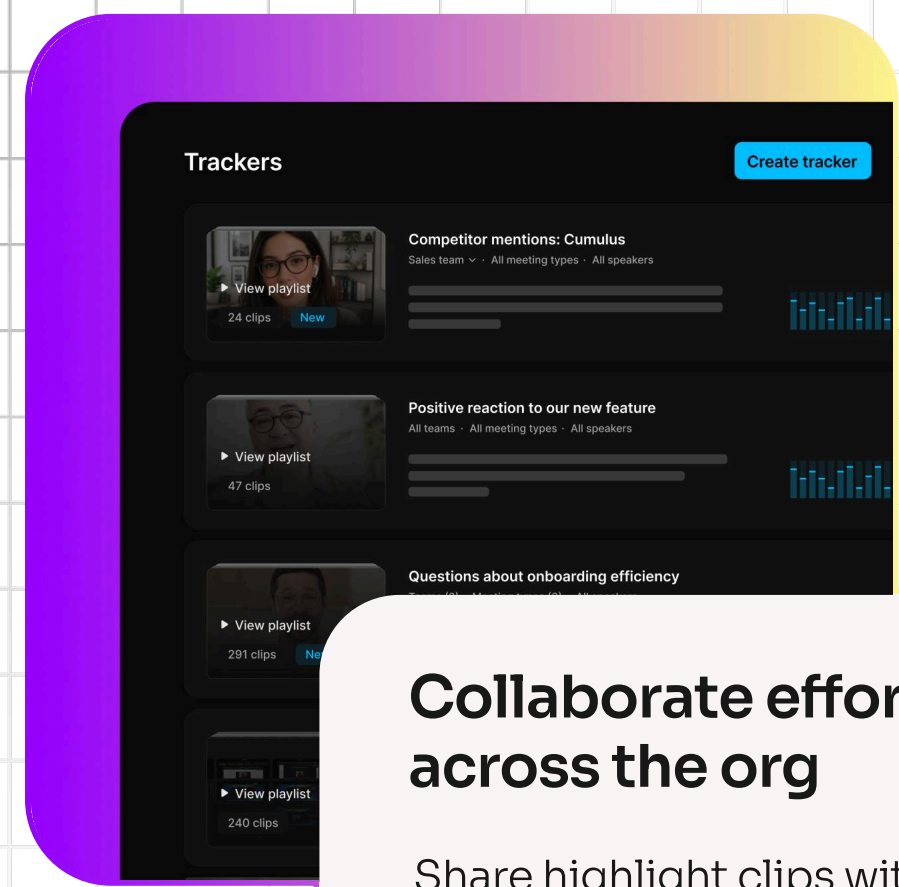

Create a repeatable sales process

AI-generated summaries follow consistent frameworks like MEDDIC, BANT, or custom schemas, while call snippets make it easier to reinforce playbooks and messaging, and searchable call libraries speed up onboarding for new reps.

Collaborate effortlessly across the org

Share highlight clips with Product, Success, or Marketing in seconds, get instant insights into customer pain points, desired features, and objections, and reduce meeting attendance as teams catch up in Fathom instead of joining live.

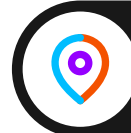

Why Sales teams **choose** **Fathom**

Fast, customizable, & accurate summaries

Fathom delivers instant, high-quality meeting summaries you can tailor to your sales methodology, ensuring every rep captures the right details without manual notetaking.

Works wherever you do

With native integrations and a flexible public API, Fathom fits seamlessly into your existing sales stack and workflows – no matter where your team meets or logs data.

Easy deployment & fast adoption

Fathom can be rolled out in minutes with minimal admin overhead, so reps start seeing value immediately and teams adopt it naturally without training friction.
