

SOLA

PERGOLAS

At SOLA Pergolas, our journey began with a simple idea: to make stunning, high-quality pergolas more affordable. We started as a retail-focused company, but quickly realized there was a gap in the market—bespoke pergolas were often overpriced, leaving customers with limited choices.

Determined to change that, we set out to offer a better solution: custom-designed pergolas at a competitive price, without compromising on quality or materials.

By controlling every stage of the process, we deliver premium products that cost nearly half the price of traditional options.

As our family run business evolved, we expanded beyond retail and now proudly source our own exclusive range of pergolas from a partner factory in the Far East. This allows us to maintain exceptional standards while giving customers the flexibility to create outdoor spaces that truly reflect their style.

With a customer-centric approach to the designing and delivery of your new pergola as well as a dedicated installation team covering mainland UK, SOLA Pergolas is committed to making luxury outdoor living accessible to everyone.

Design Your Perfect Pergola Online Today

With the SOLA Pergolas Online Configurator, creating your dream outdoor space has never been easier. Our intuitive tool lets you design and customize every detail—from size and colour to optional extras—right from your computer or mobile device. Visualize your pergola in real time, explore different configurations, and choose features that suit your style and budget. Once your design is complete, you'll receive an instant retail price, making planning simple and stress-free. Whether you want a sleek modern look or a fully equipped luxury setup, our online configurator puts the power of personalization in your hands.

KEY FEATURES

LED Lights

Every SOLA Pergola benefits from LED lights as standard. With lights available on the roof louvers (Pro & Luxe) as well as the inner perimeter gutter (Sky, Pro & Luxe), on the Pro and Luxe models you can upgrade your perimeter lights to RGB if you wish.

1

Zip Screens

Available in both Manual and Motorised with a choice of fabric colours, the frame and rails is colour matched to your pergola finish.

2

Louver Walls

Available in fixed, sliding and bi-folding variations, the louver panels can be colour matched to your pergola or finished in a contrast if you want something a little different.

3

Motorised Roof

Every SOLA Pergola benefits from a motorised roof as standard, ensuring ease of use and a watertight seal everytime the roof is closed.

4

Contrast Roof

Available on every SOLA Pergola, you can select either a colour matched louver roof or contrasting louver roof. Contrast roofs can make the space look lighter and when matched with Louver panels, add something a little different to your structure.

5

Sliding Glass

Our sliding glass walls create a space that can be used no matter the weather or time of year, the 10mm glass panes have colour matched aluminium frames to compliment your SOLA Pergola.

6

Superior Wind Speed Rating

Unlike a lot of cheaper pergolas, our structures are designed to withstand wind speeds up to Hurricane force. We always recommend opening the roof and sides during heavy winds to prolong the condition of the structure.

4 Legs or 6?

If you require a structure with no more than 4 legs, SOLA offer one of the largest 4 post options (6m x 4.5m) on the market at a super-competitive price. All pergolas over this size will have 6 legs.

Wall Mounted or Freestanding

Every SOLA Pergola, regardless of size and model, is available in both Wall Mounted or Freestanding options. Unlike lower cost pergolas, you can fit sides to Wall Mounted pergolas no problem at all.

Foot Plate Covers

Every SOLA Pergola come with footplate covers to hide those unsightly bolts anchoring the feet to the ground.

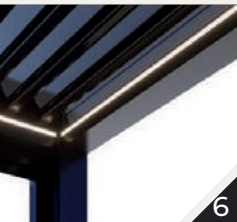

Built in Drainage

Water is channeled from the roof louvers into internal gutters. These gutters move the water across the structure and down through the legs. Depending upon the model of pergola water can either be drained through the leg or via a dedicated drain pipe.

Go Big! Go SOLA!

SOLA Pergolas feature some of the biggest possible single structures on the market. Not only that, if you want something even bigger, we can design structures to be bolted together to create one larger super-structure.
