Outsource the Headaches. *Keep the Protection.*

STN One Security Plus is SOC-as-a-Service That Works

AI is transforming enterprise operations and multiplying security risks just as fast. **Today's threat landscape moves at machine speed, exposing gaps in traditional tools and overwhelming internal teams.** For CIOs and CISOs, the pressure is mounting: one misstep can jeopardize the business. It's no longer enough to manage alerts, security has to be smarter, more unified, and deeply embedded.

STN One Security Plus is your enterprise-ready, fully managed **Security Operations Center as a Service**, built on **Palo Alto Networks Cortex XSIAM** and **NinjaOne RMM.**

How It Works

XSIAM Ingests Telemetry Across Endpoints, Identities, Networks, And External-Facing Infrastructure (Via ASM)

STN Analysts + Automation Respond To Threats In Real Time

NinjaOne Provides A Secure, Centralized Way To Manage, Monitor, And Patch All Devices — Replacing 1–2 Legacy Tools In Many Orgs

$40 Per Seat/Month Includes Fully Managed Access To:

- Cortex XSIAM for threat detection, response, and attack surface visibility
- NinjaOne RMM for automated patch management and secure endpoint control
- STN's 24x7 SOC for monitoring, triage, and escalation
- Continuous threat detection and compliance alignment

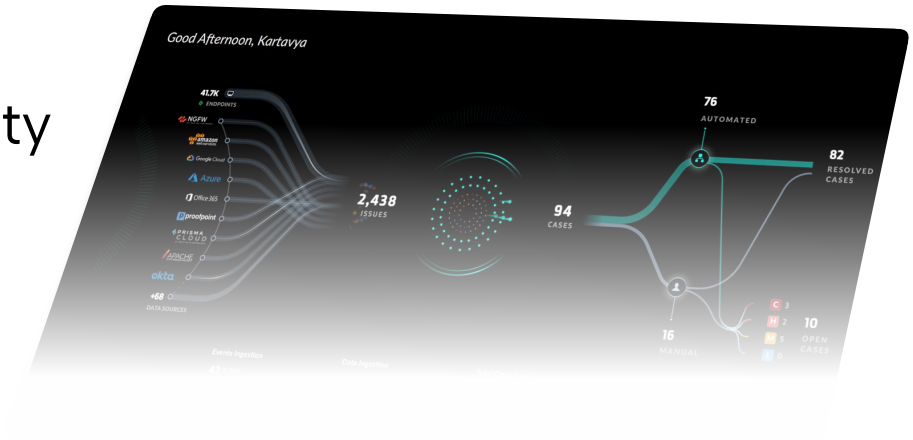
Why STN One Security Plus *is Different?*

STN One Security Plus handles the stack – you focus on the business.



Powered By:

paloalto NETWORKS

XSIAM

- Unified SIEM + SOAR + XDR + Threat Intel In One AI Engine
- Reduces Alert Noise By Up To 90%
- Correlates Low-Signal Alerts Into High-Confidence Incidents
- Built-In Attack Surface Management (ASM) Delivers Visibility Into External-Facing Systems And Exposures — Previously Available Only Via Expensive Standalone Tools
- Built-In Industry Leading SOAR And Automation Platform For Swift Incident Triage

Hardened And Streamlined By: ninjaOne

Often Replaces 1–2 IT/ Security Tools In Customer Environments

Automatically Applies OS & 3rd-Party Patches Across Windows, MacOS, Linux

Provides Centralized, Secure RMM Functionality — Consolidating Remote Access, Visibility, And Endpoint Hygiene

Uses AI To Prioritize Safe Patches & Reduce Endpoint Vulnerabilities

Supports Remote And Hybrid Teams With No Infrastructure Burden

What This Looks Like In Practice

1. Threat appears
2. XSIAM correlates data
3. STN SOC investigates
4. Automation contains
5. NinjaOne ensures the endpoint is remediated and policy-compliant
6. AASM reveals exposed assets, misconfigurations, or rogue services — with STN managing response
7. Continuous tuning improves outcomes weekly

Business Value *and Economics*

Category	DIY SOC	STN ONE SECURITY PLUS
Access to XSIAM	Separate licensing required	Included in service
RMM + Patching	Extra tools required	Included (NinjaOne)
Security Staff	Hard to hire & retain	Included 24x7
Attack Surface Visibility	Add-on tool (ASM)	Included via XSIAM
Time to Detect	Days	Minutes
Cost	$$$$$	$40/Endpoint/Month

Summary

STN One Security Plus Is The Fastest Path To A Modern SOC — Combining The Power Of Palo Alto Cortex XSIAM With Attack Surface Visibility, NinjaOne's Secure Endpoint Control, And STN's Certified Operational Excellence.

You Get Outcomes, Not Just Alerts. Prevention, Not Just Reaction. Visibility, Not Just Noise.
