Why STN for Data Resilience

Availability
- 99.9999% uptime guarantee via CoreSite Data Centers (3 U.S. markets)
- Cohesity on HPE architecture for resilient multi-site replication
- Centralized file retrieval with intuitive "Google-like" search

Information Security
- Ransomware protection and immutability with encryption in transit & at rest
- Compliance-ready Colo: ISO27001 | PCI DSS | SOC Type 2 and SOC 3

Scale Out
- Cohesity allows seamless expansion without downtime
- Interconnected via CoreSite OCX fabric for data mobility
- Multi-site normalization and replication capabilities

COHESITY Smart Data Platform
— AI-Powered Resilience

Cohesity AI enhances operational insight—using natural language to query data sets, recovery points, and compliance status
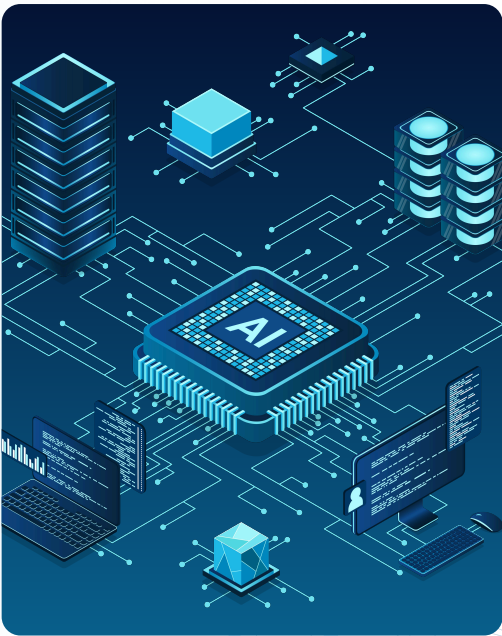

Cohesity uses AI and ML-driven threat detection to identify anomalies and ransomware activity before impact

Accelerates recovery through AI-assisted search and context-aware restore

Reduces data silos by unifying backup, DR, and file/object workloads under a singular cohesive data intelligent platform
