

5 Easy Ways

to Process Household Waste

SORT WASTE BY TYPE

Provide separate containers for various types of waste, such as plastic, paper, metal, glass, and organic waste like food scraps.

2

LABEL EACH WASTE BIN

Clearly label the waste bins so that family members know which ones are used for specific types of waste.

PROCESS ORGANIC WASTE

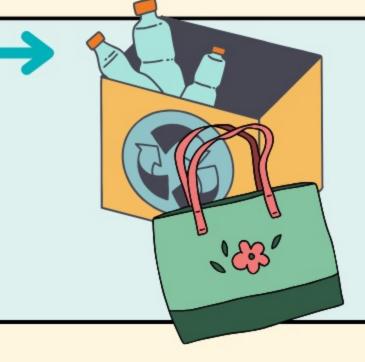

Organic waste, such as food scraps, leaves, etc., can be processed into compost that can be used to enrich the soil in the backyard.

4

COLLECT & RECYCLE NON-ORGANIC WASTE

Sort non-organic waste by type and then send it to collectors such as waste banks to give it economic value.

5

IMPLEMENT THE 3R (REDUCE, REUSE, RECYCLE)

Reuse unused items such as used water jugs as plant pots, old tires as chairs, etc.
