

Mountain apartment **Meluzína**

| 2
Floor

| 128 m²
Total area*

| BJ12.3
Apartment unit designation

1097 m above sea level

The proper mountaineers always hold their source of strength in high regard. You can also pay tribute to the Ore Mountains, especially if you decide to acquire one of the mountain apartments in the Slovanka residential project – perhaps Meluzína. The fourth-highest peak in the entire mountain range has a rocky summit, offering magnificent views in all directions. Although the hiking trail does not lead to the peak, a forest path will take care of the panoramic views for you.

- Currently, the layout of the residential space is being adjusted by the Ivanka Kowalski studio for maximum utilization. The floor plan of the apartment unit will be available by January 2024.
- During Q1/2024, it is still possible to incorporate client modifications according to their requirements for the layout of the apartment unit.

The sale of mountain apartments is managed by the RWProjekt company.
