Apartment unit designation

## 1029 m above sea level

The administrative mountaineers always hold their source of strength in high regard. You can also pay tribute to the Ore Mountains, especially if you decide to acquire one of the mountain apartments in the Slovanka residential project – perhaps Plešivec. At its summit, you will find a well-functioning restaurant and a publicly accessible stone lookout tower dating back to 1895. There are also ample facilities for sports enthusiasts to indulge in.

- Currently, the layout of the residential space is being adjusted by the Ivanka Kowalski studio for maximum utilization. The floor plan of the apartment unit will be available by January 2024.
- During Q1/2024, it is still possible to incorporate client modifications according to their requirements for the layout of the apartment unit.

**The sale of mountain apartments is managed by the RWProjekt company.**
