

Mountain apartment Tetřeví hora

3
Floor

61 m²
Total area*

BJ12.4
Apartment unit designation

DESIRA

1007 m above sea level

The proper mountaineers always hold their source of strength in high regard. You can also pay tribute to the Ore Mountains, especially if you decide to acquire one of the mountain apartments in the Slovanka residential project – perhaps Tetřeví hora. The original one, after which the mountain apartment got its name, rises only about five kilometres from God's Gift (Boží Dar), alternating spruce forests with expansive clearings. As the name suggests, while exploring the surroundings, you may catch a glimpse of the rare capercaillie.

- Currently, the layout of the residential space is being adjusted by the Ivanka Kowalski studio for maximum utilization. The floor plan of the apartment unit will be available by January 2024.
- During Q1/2024, it is still possible to incorporate client modifications according to their requirements for the layout of the apartment unit.

The sale of mountain apartments is managed by the RWProjekt company.
