

DULUX WOOD STRIPPER

8851

Makes short work of removing previous / failing coatings, mould, mildew, dirt and grime from wood surfaces and composite materials.

- Stripper and cleaner in one - brush on, wait 30 minutes, scrub lightly and rinse.
- Removes both oil and latex coatings.
- Use full strength or diluted for multiple uses.

TIP: Semi-transparent stains can only be applied over existing semi-transparent stains or properly prepared (resurfaced) bare wood.

Exterior Semi-Transparent Stain
Product Overview

THE DULUX DIFFERENCE
HIGH-PERFORMANCE WOOD CARE
PRODUCTS, TRUSTED RESULTS.

Our comprehensive family of Dulux Professional Wood Finishes consistently lives up to our reputation for exceptional, total, product performance.

Dulux stains are made with superior raw materials and have undergone extensive product testing with chemists, field experts and professional applicators. Our selection of semi-transparent exterior stain colours brings out the best of wood’s natural beauty.

Trust Dulux Professional Wood Finishes to protect and beautify for years to come.

Wood Finishes

DULUX DECK WASH

8853

The perfect start to any stain project. Cleans coated and uncoated wood and composite surfaces, and brightens grey or weathered wood.

Ready-for-use - no mixing required.

- Refreshes stained decks where the coating is in good condition.
- Removes staining caused by mould, mildew and algae.
- Safe for cedar and redwood, without discoloration.

TIP: Remove mildew spores by scrubbing affected areas with a mixture of 1L of household bleach and 3L of water. Rinse thoroughly before using Dulux Deck Wash.

NOTE: Never mix bleach with Dulux Deck Wash.

DULUX CWF-UV®5 PENETRATING WOOD FINISH

8550, 8590

Provides the durability of an acrylic finish and the richness of a penetrating alkyd. Offers the very best sun protection (in 7 exclusive, lightest of stain colours) through a blend of transparent iron oxides and UV and visible light stabilizers.

- Repels water, keeping wood dry and protected from infestation, rot and decay.
- Effective mildewcides protect from mildew growth.
- Base requires no colourants to achieve prime UV protection, with minimal colour change.

GUARANTEED PERFORMANCE: 5 years on fences or siding, 3 years on decks.

DULUX SEMI-TRANSPARENT ACRYLIC/OIL STAIN

8790

Offers excellent sun protection from a blend of transparent iron oxides and UV and visible light stabilizers (ideal with deeper colours), and the durability of an acrylic finish and the richness of a penetrating alkyd.

- Repels water, keeping wood dry and protected from infestation, rot and decay.
- Effective mildewcides protect from mildew growth.
- Exceptional penetration and application properties deliver a perfect finish.

GUARANTEED PERFORMANCE: 5 years on fences or siding, 3 years on decks.

DULUX SEMI-TRANSPARENT OIL FINISH

8144

A rich, oil-based formula that penetrates and protects, delivering excellent adhesion and beautifying all exterior wood surfaces.

- Highly water repellant, helping to prevent water penetration.
- Contains effective mildewcides to protect surfaces from mildew growth.
- Once tinted, protects wood from sun's damaging rays.

GUARANTEED PERFORMANCE: 5 years on fences or siding, 3 years on decks.

WOODPRIDE OIL/ACRYLIC SEMI-TRANSPARENT STAIN

9750, 9790

Fortified with natural, penetrating oils that provide quality adhesion and good UV protection, the acrylic component delivers very good durability.

- Repels water, helping to prevent water penetration.
- Effective mildewcides reduce surface mildew growth.
- Cedar Treatment protects with minimal colour change, while tint base offers a wide range of colours and finishes.

TIP: For best results when staining, coat all surfaces, paying close attention to end grains and cuts.
