

GENERAL OUTPATIENT SERVICES

SUPPORT FOR RECOVERY.

TOOLS FOR LIFE!

General Outpatient Services (GOP) help people who want treatment for alcohol/substance use.

Patients meet with counselors one-on-one and join group counseling sessions.

Our counselors help people build skills to make healthy choices and reach their recovery goals. We connect patients with support services.

Recovery means more than abstinence. It is about building a healthy life with support from family, friends, and activities; bringing purpose and joy.

Call us and get a treatment track started within 24-48 hours of your first contact.
