

## TEST QUESTIONS: ENERGY HAZARDS

Your Name:		Date:	
Company:		IEC #:	

The **BSO Plus Safety Topic** is a review designed from the BSO Plus agenda. This safety topic is your way to stay current on the safety information over the 3 years between BSO Plus and BSR.

- 1. Before executing work with hazardous energy, the permit receiver is responsible for:**
  - Isolating, draining, depressurizing, and purging equipment of hazardous energy
  - Establishing limits to create a safe work envelope
  - Verifying with Operations that hazardous energy has been controlled or isolated
  - None of the above
- 2. The Construction Regulation 213/91 s.190.(6) states that a danger tag shall: (Circle all that apply)**
  - Be made of non-conducting material and shall be installed so as not to become energized
  - Be placed and secured in a noticeable location
  - Indicate why disconnected; name of person who disconnected; name of person's employer; and date of disconnect
  - The employee ID number of the person who attached the tag
- 3. Locally, the IEC Safety Partnership requires tags to include a contact information of the person who installed the tag.**
  - True
  - False
- 4. In addition to electrical energy, workers may be exposed to hazards from which of the following: (Circle all that apply)**
  - Hydraulic energy
  - Chemical energy
  - Driving energy
  - Mechanical energy
- 5. Primary energy is:**
  - Energy within the system that is not being used
  - The supply of power that is used to perform work
  - Energy from an explosion, flame, objects with high or low temperatures or radiation from heat sources
  - Both (a) & (b)
