

PALOMA'S WELDLESS MISSILE

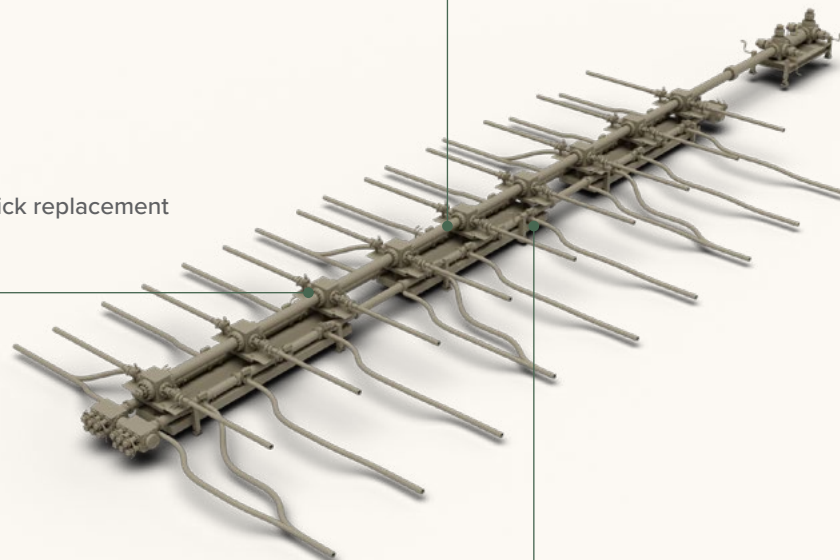

A Powerhouse Missile for Optimal Frac Performance

The name says it all. Paloma's **Weldless Missile™** is a patented powerhouse missile system that delivers advanced pressure control capabilities from the pump to the wellbore. Built for precision and durability, the Weldless Missile offers stronger, seamless connections to improve functionality while minimizing the need for infield maintenance and the risk of pinhole leaks. And with a modular single or double missile configuration, the Weldless Missile is easily scalable for optimal pump performance.

1,500 stages and counting without part replacement underscores Weldless Missile's proven performance

INNOVATIVE ENGINEERING

- Patented design eliminates 100% of common stress points
- Strong, seamless connections
- Modular and easily scalable
- Single or double missile configurations
- Machined composite blender block
- Flanged distribution line
- Robust, interchangeable components provide for quick replacement

PERFORMANCE

- Faster, more efficient pump utilization
- Smooth, reliable pressure distribution and seamless fluid transition
- Reduced pump cavitation
- Fast repairs with minimal downtime

SAFETY AND EFFICIENCY

- Durable design for safer operations
- Faster, easier maintenance with no need for infield welding

Experience the confidence of seamless connections with Paloma's Weldless Missile – optimize your frac operations, enhance safety, and minimize downtime with a missile system that works as hard as you do.

WHY CHOOSE PALOMA?

Paloma is proud to be advancing the energy industry with smart, customized innovations like our Weldless Missile, but Paloma isn't just about frac equipment. Founded in 2016 on three simple yet powerful principles — take care of our people, take care of our customers, and outwork and outsmart the other guys — we bring unrivaled ingenuity and a relentless “get it done” work ethic to every frac site.

At Paloma, pressure doesn't break us — it drives us.

Contact us today to learn more about how Weldless Missiles™ are reshaping industry expectations.
