

# PALOMA'S MF FRAC VALVE LINE

## Elevating Performance Expectations

Paloma's innovative **MF Frac Valve™** is redefining performance on the pad site. Engineered to withstand the oilfield's toughest conditions, Paloma's safe, maintenance-free valves promise to save operators time, money, and manpower.

With a built-for-purpose design, the MF Frac Valve eliminates traditional in-field service challenges, reduces nonproductive time, and lasts longer on the job than conventional valves.

**Paloma's large, hardworking fleet of MF Frac Valves deliver 300% improved runtime without repair or maintenance.**

## EFFICIENCY

- Reduce repair costs and turn around time
- Minimal need for infield service
- Significantly reduces nonproductive time
- Large, dynamic fleet encompasses all sizes and pressure ratings
- Eliminate grease cost

## RELIABILITY

- Field-proven durability and longevity
- Robust, best-in-class parts
- Simplified design with fewer potential points of failure

## SAFETY

- Fewer field service techs onsite
- Rigorous pressure testing protocols
- Unmatched quality control
- Eliminate hazards associated with pressurized hoses

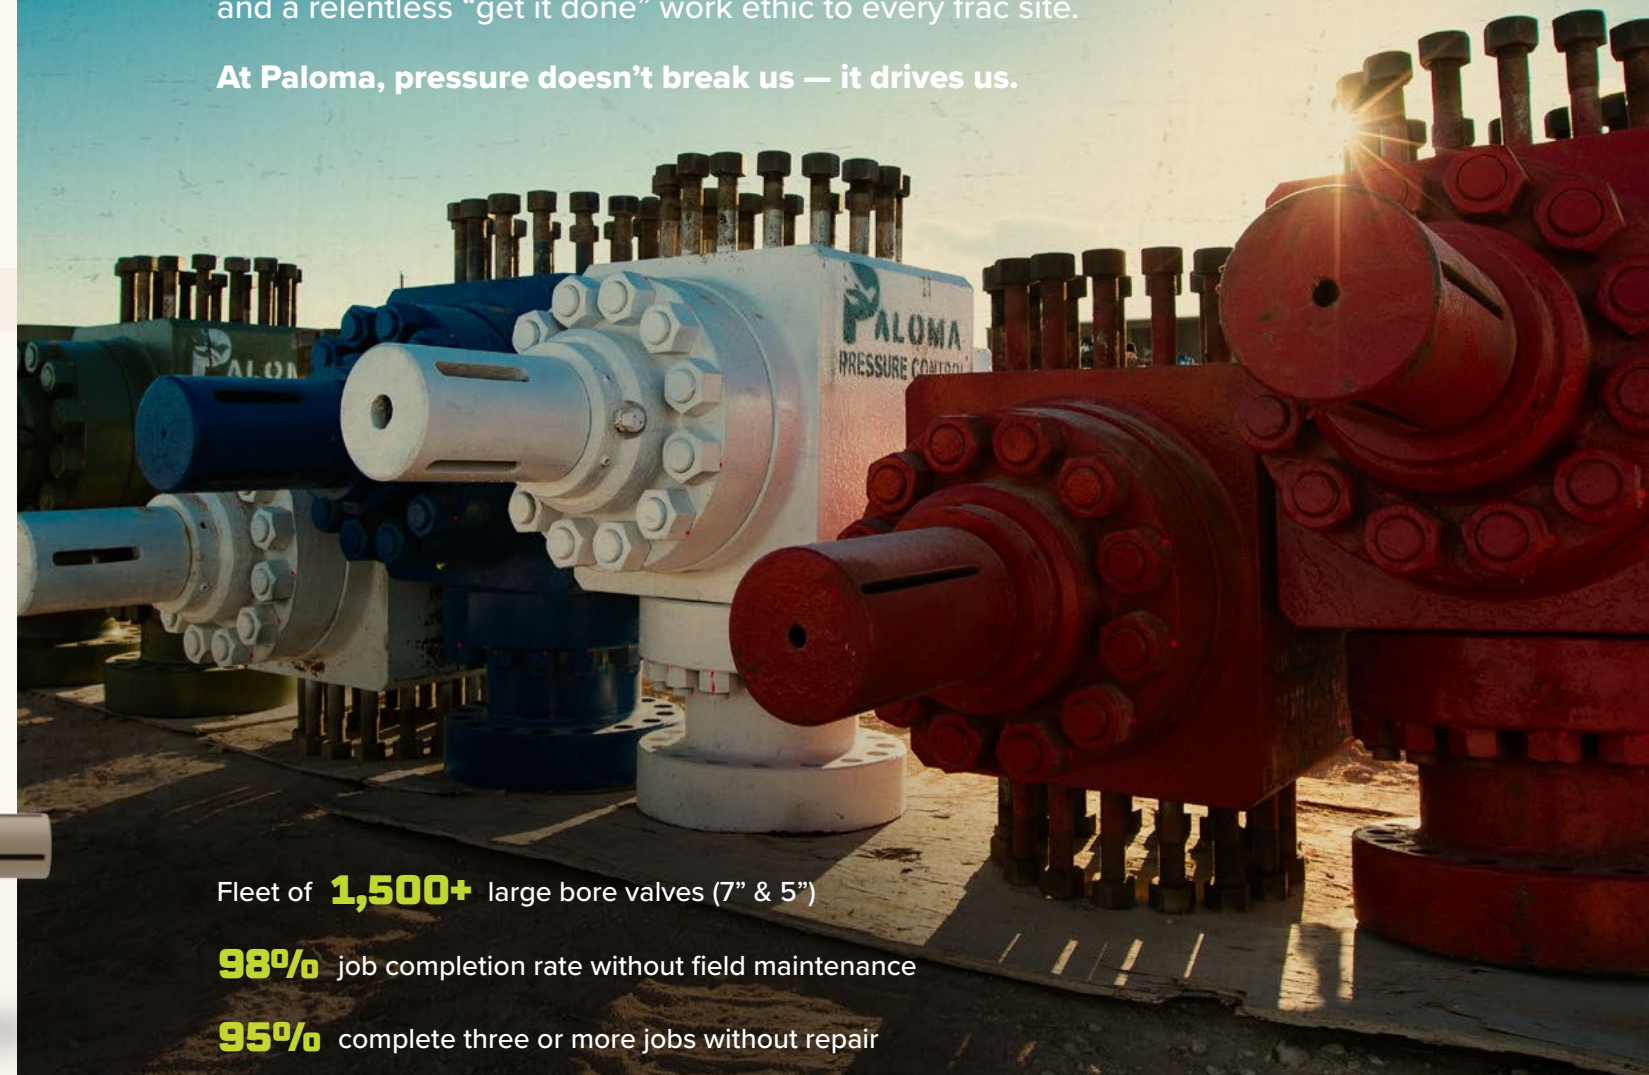

By eliminating the need for continuous maintenance and reducing downtime, MF Frac Valves™ are reshaping what's possible on the pad site.

## WHY CHOOSE PALOMA?

Paloma is proud to be advancing the energy industry with smart, customized innovations like our MF Frac Valves, but Paloma isn't just about frac equipment. Founded in 2016 on three simple yet powerful principles — take care of our people, take care of our customers, and outwork and outsmart the other guys — we bring unrivaled ingenuity and a relentless “get it done” work ethic to every frac site.

**At Paloma, pressure doesn't break us — it drives us.**

Fleet of **1,500+** large bore valves (7" & 5")

**98%** job completion rate without field maintenance

**95%** complete three or more jobs without repair

**65%** repair cost reduction passed onto customers

**70%** reduction in grease utilization and waste
