

International Advisory

Introduction

Many businesses and even consumers will buy and sell goods to and from overseas. It's often a case of 'Where do I start?' when it comes to considering what the tax laws are in foreign countries. This question is also asked by the many foreign inbound investors into Australia. As an independent member firm of UHY International, our expert tax advisers here in Australia have access to professional support across 96 countries.

In addition, many new local subsidiaries need help in navigating the compliance issues in managing the new business. Management is focused on sales and growth - we can take care of the rest until you are ready to grow your local team.

Capabilities

Our International Advisory capabilities are as follows. Refer to our Capability Statements to see how we execute to meet your business needs.

- International Tax
- Doing Business Overseas
- Foreign Inbound Advisory
- Subsidiary CFO Services
- Transfer Pricing

Benefits

The benefits to you are:

1. You can achieve the right tax outcomes whether you are looking to trade overseas or, if you are inbound, coming to Australia to set up business.
2. Direct and indirect taxes will vary from country to country, and you need certainty when you step ashore in a foreign country. The UHY network, located in 96 countries, provides our clients with the support they need doing business across the world.
3. When you come to Australia you want to focus on growing the business. Our CFO services can take away the worry of the day-to-day compliance needs, leaving you free to build the business.
4. Australian and overseas tax authorities will take a keen interest in your trading activities. Being able to navigate the complex transfer pricing rules is what we do well, giving you certainty as you look to set product pricing and build client relationships.
