

# Attached Pipe Frame Securement

**ANCHOR  
PRODUCTS®**  
Connections That Last

## ***The Attached Pipe Frame Securement Solution***

*is a strong, versatile system engineered to support rooftop piping, conduit, and mechanical equipment while maintaining the roof's long-term integrity. Designed to meet modern commercial roofing standards, it offers a stable, low-profile method of attachment that eliminates ballast, reduces weight, and preserves waterproofing performance.*

*With U-Anchor™ Attachments, this solution provides a secure, watertight connection that resists wind uplift, weather exposure, and heavy rooftop loads. Its efficient design ensures quick installation, lasting strength, and adaptability across a wide range of attached rooftop applications.*

## Product Specifications

### **FEATURES:**

Built with durable materials and a roof-friendly design to ensure long-lasting securement.

- Utilizes U-Anchor Series Attachments for strength and durability.
- Attaches to multiple roof types, including single-ply, asphalt, coated, and fabric-based systems.
- Compression-free™ design protects the roof surface.
- All exposed hardware is corrosion-resistant.
- Securement cables available in standard and custom lengths.

### **BENEFITS:**

Provides safe, fast, and reliable installation while protecting your roof and improving performance.

- Safely attaches to a wide range of roofing systems.
- Installs quickly with minimal labor.
- Provides a secure, Compression-free™ alternative to traditional methods.
- Protects the roof surface while maintaining watertight performance.
- Offers long-term durability and reliability.
