RE: MS State Senate – Bradford Blackmon– Letter of Support

Kosciusko Junction Pipeline Project
Docket No. CP25-547-000
CP25-549-000

Gulf South Pipeline Company, LLC
Texas Gas Transmission, LLC

Dear Secretary Reese:

As a member of the Mississippi State Senate, I am pleased to express my support for the Kosciusko Junction Pipeline Project (“Project”), a vital infrastructure initiative proposed by Gulf South Pipeline Company, LLC and Texas Gas Transmission, LLC—subsidiaries of Boardwalk Pipelines, LP (“Boardwalk”).

The Project will expand and modernize existing pipeline infrastructure in western Mississippi, adding 1.16 billion cubic feet per day of natural gas transportation capacity. This enhancement is essential to meet the increasing energy demands of our power generators, manufacturers, and data centers, while also improving system reliability and flexibility for customers across the region.

Boardwalk has demonstrated a strong commitment to responsible development and stakeholder engagement. Throughout the Federal Energy Regulatory Commission (“FERC”) Pre-Filing process, Boardwalk has kept our communities informed through open houses, project updates, and comprehensive environmental and cultural resource surveys. Their approach reflects a thoughtful and transparent development strategy.

This Project aligns with our state’s goals to promote economic growth, attract investment, and ensure energy security. It will generate jobs, increase local tax revenues, and support long-term prosperity for Mississippi residents and businesses.

I respectfully urge the FERC to approve the Certificate of Public Convenience and Necessity for the Project. Its successful implementation will reinforce our energy infrastructure and contribute meaningfully to Mississippi's future.

Thank you for your consideration.

Sincerely,

Bradford Blackmon, Senator
Attala, Madison, Leake and Holmes County
Mississippi State Senate

Kosciusko Junction Pipeline Project
Docket No. CP25-547-000
CP25-549-000
Gulf South Pipeline Company, LLC
Texas Gas Transmission, LLC

Dear Secretary Reese:

As a member of the Mississippi State Senate, I am pleased to express my support for the Kosciusko Junction Pipeline Project (“Project”), a vital infrastructure initiative proposed by Gulf South Pipeline Company, LLC and Texas Gas Transmission, LLC—subsidiaries of Boardwalk Pipelines, LP (“Boardwalk”).

The Project will expand and modernize existing pipeline infrastructure in western Mississippi, adding 1.175 billion cubic feet per day of natural gas transportation capacity. This enhancement is essential to meet the increasing energy demands of our power generators, manufacturers, and data centers, while also improving system reliability and flexibility for customers across the region.

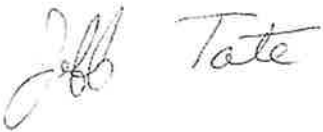

Boardwalk has demonstrated a strong commitment to responsible development and stakeholder engagement. Throughout the Federal Energy Regulatory Commission (“FERC”) Pre-Filing process, Boardwalk has kept our communities informed through open houses, project updates, and comprehensive environmental and cultural resource surveys. Their approach reflects a thoughtful and transparent development strategy.

This Project aligns with our state's goals to promote economic growth, attract investment, and ensure energy security. It will generate jobs, increase local tax revenues, and support long-term prosperity for Mississippi residents and businesses.

I respectfully urge the FERC to approve the Certificate of Public Convenience and Necessity for the Project. Its successful implementation will reinforce our energy infrastructure and contribute meaningfully to Mississippi's future.

Thank you for your consideration.

RE: MS State House of Representatives – Otis Anthony – Letter of Support

Kosciusko Junction Pipeline Project
Docket No. CP25-547-000 / CP25-549-000
Gulf South Pipeline Company, LLC / Texas Gas Transmission, LLC

Dear Secretary Reese:

As a member of the Mississippi State House of Representatives, I am pleased to express my support for the Kosciusko Junction Pipeline Project (“Project”), a vital infrastructure initiative proposed by Gulf South Pipeline Company, LLC and Texas Gas Transmission, LLC—subsidiaries of Boardwalk Pipelines, LP (“Boardwalk”).

The Project will expand and modernize existing pipeline infrastructure in western Mississippi, adding 1.175 billion cubic feet per day of natural gas transportation capacity. This enhancement is essential to meet the increasing energy demands of our power generators, manufacturers, and data centers, while also improving system reliability and flexibility for customers across the region.

Boardwalk has demonstrated a strong commitment to responsible development and stakeholder engagement. Throughout the Federal Energy Regulatory Commission (“FERC”) Pre-Filing process, Boardwalk has kept our communities informed through open houses, project updates, and comprehensive environmental and cultural resource surveys. Their approach reflects a thoughtful and transparent development strategy.

This Project aligns with our state’s goals to promote economic growth, attract investment, and ensure energy security. It will generate jobs, increase local tax revenues, and support long-term prosperity for Mississippi residents and businesses.

In particular, for communities like those I represent in the Mississippi Delta and other rural parts of the state, this Project represents more than energy infrastructure, it is an opportunity for inclusion, modernization, and hope. For too long, rural counties have faced limited access to reliable energy resources, which in turn constrains industrial growth and job creation. Projects

like the Kosciusko Junction Pipeline can help bridge that divide by opening new pathways for energy-driven industries to locate and expand in small towns, bringing with them training, employment, and renewed economic vitality.

The Delta's agricultural producers, food processors, and manufacturing facilities depend on affordable, efficient energy to remain competitive. Strengthening our natural gas capacity ensures that our small businesses, hospitals, and schools have the dependable power they need to serve their communities, especially as we pursue innovation in technology, broadband, and rural workforce development.

I respectfully urge the FERC to approve the Certificate of Public Convenience and Necessity for the Project. Its successful implementation will reinforce our energy infrastructure and contribute meaningfully to Mississippi's future, a future that includes the Delta, rural Mississippi, and all communities striving for equitable growth and prosperity.

Thank you for your consideration.
