

TEXAS GATEWAY PROJECT

Gulf South Pipeline Company, LLC (Gulf South), a subsidiary of Boardwalk Pipelines, LP (Boardwalk), proposes to construct the Texas Gateway Project, which will include approximately 155 miles of new pipeline, consisting of 36-inch- and 42-inch-diameter segments. The Texas Gateway Project will safely and efficiently deliver natural gas through new facilities and increase capacity and reliability on Gulf South's system. This expansion will help meet the growing demand for liquefied natural gas production and export, while also enhancing energy security and driving economic growth along the Gulf Coast of the United States.

DESCRIPTION

The Texas Gateway Project will be located in Texas and Louisiana in the following areas:

- **Texas:** San Jacinto County, Panola County, Shelby County, San Augustine County, Sabine County, Jasper County, Newton County
- **Louisiana:** Beauregard Parish

The Texas Gateway Project involves the construction and operation of the following:

- approximately 155 miles of new pipeline, consisting of 36-inch- and 42-inch-diameter segments from Panola County, Texas to Beauregard Parish, Louisiana;
- a new compressor station in San Jacinto County, Texas; and
- modifications to the existing Carthage Compressor Station in Panola County, Texas and Magasco Compressor Station in Sabine County, Texas.

BENEFITS

ECONOMIC BENEFITS

- Contributes significantly to local economies through taxes, jobs, and infrastructure investment
- Increases local tax revenue and supports local services
- Provides cost-effective and reliable natural gas supply to customers
- Provides critical infrastructure to meet regional and national energy needs

COMMUNITY BENEFITS

- Enhances energy resilience and diversity for local communities
- Boosts the local economy through construction activity and long-term revenue from taxes
- Promotes meaningful engagement with community stakeholders to identify long-term opportunities for value creation

UTILITY AND INFRASTRUCTURE BENEFITS

- Increases pipeline capacity and improves energy diversity in Texas, Louisiana, and the Gulf Coast region
- Incorporates modern and upgraded facilities to meet energy needs
- Supports power generation, which creates additional jobs and economic opportunities in Texas and Louisiana
- Contributes to a more secure and reliable energy network for homes, businesses, and industries
