60^Y SIXTY-YEAR WARRANTY

CREATIVE POSSIBILITIES

ECO-FRIENDLY

Our range of surfaces create expressions for future generations

Steni delivers the widest and most exciting array of solutions: combining multiple formatting opportunities for the facade industry. Delivering more than 50 million m2 of facades and 60 years in business, we stand as a reputable manufacturer of cost-effective façade solutions with lasting aesthetics.
That is why we offer a 60-year functional warranty.

Steni works closely with building owners, architects and contractors to ensure long-term relationships. By combining experience with knowledge, innovation and enthusiasm – and by providing good BIM tools, our goal is that you, our customers, will experience increased value beyond the product itself. Our customers should expect quick and easy service, good logistics solutions and strong customer service.

At Steni we believe enduring aesthetics, quality and the environment are the keys to a good future. To verify this we have third-party verification and certificates to support our claims. We work hard to minimize waste, reduce CO2 emissions and ensure that the life cycle costs of the buildings are kept low.

PRODUCT ADVANTAGES

60^Y — 60-year functional warranty

Pre-drilled and cut

Impact resistant

Withstands frost and water

Wide range of colours

Eco-friendly

Easy installation

Durable

Easy cleaning

Adviser competence

Range of surfaces, gloss levels and textures

Reduced on site material waste

Easy to remove graffiti

CONTENTS

STENI COLOUR 60ʸ

With Steni Colour façade panels you can play with colours, colour combinations and surfaces to give your building a perfect appearance.

STENI STANDARD FASTENERS (ACID-RESISTANT A4)

Product	Dimensions	No. per pack
Wood screw*	4.8 × 28/33 mm	500 pcs
Metal screw (self-drilling)	4.8 × 25 mm	500 pcs

We estimate 15 screws per m². The formula for calculation is: number of m² x 15 / 500 (one pack contains 500 screws).
The screws are supplied with a pan head and a T20 head (see page 23 for a complete overview).
*   Stocked with untreated heads, and with painted heads in stock panel colours.

Steni Colour is easy to maintain, quick to install, with minimal waste. The panels are environmentally friendly, and thanks to the warranty of 60 years the total life-cycle cost is the lowest in their class.

Steni Colour is a fibreglass-reinforced stone composite panel suitable for cladding on all types of buildings. The panels should be installed in accordance with our installation instructions. Steni Colour is available in a wide range of standard colours and formats, and in three gloss levels, you will always be able to find a variant that is perfect for your project.

STENI COLOUR

With Steni Colour, you can choose from 80 standard colors and three gloss levels.

· Choose Steni Colour in the standard size of 1195x2995 mm if you plan to cut/drill the façade panels on-site.

· Choose for customized lengths and widths, as well as pre-drilled panels, to minimize waste and time at the construction site.

We offer all widths between 196 mm and 1195 mm, and all lengths between 850 mm and 3495 mm. The maximum size is 1195x3495 mm.
The full production width of 1195 mm is always charged.

For a complete overview of size options, see the table on page 26.

COLOUR CORE

Steni Colour is supplied with coloured light or dark core colour. In addition, we do have the opportunity to deliver panels with edge paint. SN 8008 (NCS S 8000-N).

Light core colour

Dark core colour

Dark edge coating

STENI COLOUR PLANK (FS200)

· Minimum quantity: 50 m².
· 80 standard colours available.
· Steni Colour Plank is available with a light or dark through-coloured core.
· If desired, Steni Colour Plank can be ordered with edge coating in the same colour as the surface color; in this case, the plank is produced with a light core.
· Steni Colour Plank is pre-drilled at the factory (adapted for vertical battens with 600 mm spacing).

Note: Since the planks overlap, you will need approximately 1.15 m² of Steni Colour Plank per m² of wall surface.

Dimensions (Height x Length), including pre-drilling
· 196 x 1795 mm
· 196 x 2395 mm
· 196 x 2995 mm

ABOUT COLOUR CODES

All standard surfaces have a unique Steni code beginning with SN, e.g. SN 8010 (Colour), SN 100 (Nature)In addition we give NCS colour codes for Steni Colour to make it easier for you to match the colour with other products.

COLOUR PRECISION

We check the colour of Steni Colour using a spectrophotometer, which measures colour differences in accordance with the measuring methods specified in CIE 15:2004.
The permitted variance within the same batch is $\Delta E = 0.5$
The permitted variance between different batches is $\Delta E = 3.0$

CAN'T FIND THE COLOUR YOU'RE LOOKING FOR?

We mix all of the colours for Steni Colour ourselves in the factory. This enables us to offer special colours within the NCS and RAL colour systems. We now have over 2,200 approved colours in our archive, so please contact us if you want a colour that is not in our standard range. Unused paint degrades over time, so all colours, whether standard or special colours, are mixed to order.

Even though our processes are high-precision, there may be small variations between mixes. You may wish to bear this in mind if your project is being planned with partial deliveries. Note that we are unable to offer exact colour matches between multiple production runs.

Find out more about why Steni is good for the environment.

◯ The samples indicated with a white dot have a light core colour as standard.　● The samples indicated with a dark dot have a dark core colour as standard.

*Signal colours cannot be supplied in matt gloss (M): only in half matt (HM) and high gloss (HG).
Colours that have dark core colour as standard can also be delivered with a light core colour on request.
Printed colours may deviate slightly from the actual colours. Please request a product sample.

STENI COLOUR REUSE

The façade system designed for reuse

60ᵞ

The Re Use of building materials is the current and future answer to several global environmental challenges. Steni Colour Reuse is a façade system designed to be used repeatedly.

Our façade panels are environmentally friendly and have an expected lifetime of more than 100 years which makes them a good choice for the environment and sustainability. Now we have taken the step further by launching Steni Colour Reuse, a set of standardised façade panels that systemise reuse.

These are façade panels that can be reused directly, when they have finished their service in a building. Steni Colour Reuse comes with a written 60-year functional warranty.
STENI COLOUR REUSE PRODUCTION FORMATS (mm)

Minimum 10 m² per division.

Standard panel divisions*	Standard production length
395 + 395 + 395	1195 , 1595 , 2395
595 + 595	1195 , 1795 , 2395
795 + 395	1195 , 1595 , 2395
1195**	1195 , 1795 , 2395

* All panels split from the same full-width panel must be of the same length.
**No minimum quantity for 1195 mm width.

PROPERTIES OF STENI COLOR REUSE

SUSTAINABLE OPPORTUNITIES

A used Steni facade panel can be reused as it is by adapting the boring on the new facade to the drill pattern on the used facade panel (standard c/c 400 mm or c/c 600 mm).

ROOM FOR FLEXIBILITY AND CREATIVITY

Steni Colour Reuse comes in 12 different panel sizes corresponding to the mindset behind Lego ®. The colour selection is the same as for Steni Colour, i.e. 80 standard colours, of which 70 can be supplied in three gloss levels; M, HM and HG and 10 can be supplied in two gloss levels; HM and HG.

EASY TO ASSEMBLE AND DISASSEMBLE

Steni façade panels are robust and impact-resistant. They can be easily assembled, disassembled, and reassembled again - several times - without being broken in the processes.

STANDARDIZED TO DRILL PATTERN

Steni Colour Reuse is available in 6 formats pre-drilled with standard drilling patterns adapted to c/c 400 mm and 6 formats pre-drilled with standard drilling patterns adapted to c/c 600 mm. The formats and drilling patterns are adapted for both horizontal and vertical mounting.

FROM LINEAR TO CIRCULAR ECONOMY

At Steni we recognize the importance of contributing to a sustainable circular economy. One of our key features is durability and we want to send as little material as possible out of the cycle.

This is why, after reaching the end of one cycle, it is our goal that 100% of Steni Colour Reuse will be reused in either new projects or renovations.

Book a project meeting (follow the QR code).

STENI VISION 60ᵞ

Steni Vision panels are made of stone composite and can be used both internally and externally. When mounted according to our installation instructions.

STENI VISION

Steni Vision Standard is available in 64 different designs. Each design comes with a predefined gloss level, with two additional gloss levels available upon request. Additionally, we can adjust color shades on our standard designs.

To minimize pattern repetition on the façade, we have developed multiple full-format files for each pattern.

We offer all widths between 196 mm and 1213 mm, and all lengths between 850 mm and 3190 mm. The full production width of 1195 mm is always charged. Maximum panel size is 1213 x 3190 mm.

Panels are delivered with light-colored edges as standard, but dark edges are available for an additional cost.

Screw and joint colors are specified in NCS S (Second Edition) color codes, abbreviated as "S" followed by the color code.

For a complete overview of the available formats, see tables from page 27.

● The samples indicated with a red dot are available in both 17x24 cm and 10x15 cm. All other samples are available in 10x15 only.

*Caulk colour" specifies the colour of the sealant in the corners of the L- and U-elements.

Steni Vision is easy to maintain and quick to install, with minimal waste. The panels are environmentally friendly, and thanks to the lifetime warranty of 60 years the total life cost is the lowest in their class.

We have the opportunity to change colours on all standard Vision patterns at an additional cost.

Take a deep dive into our ocean of surfaces. Use the QR code or see steni.com

STENI VISION CUSTOM

The digital print technology that we use in the production of Steni Vision enables you as the customer to create a completely unique effect for your façade.

We work closely with skilled graphic designers who can help you to realise your idea. Our partners can help you with everything from the initial concept to the finished, print-ready files. As is normal in the field of graphic design and printing, the printing technology is based on the CMYK colour system.

Visit our website to find out more about how to plan and realise your Vision project.
Our experts will help you to achieve a brilliant result!

STENI VISION GIVES YOU OPPORTUNITIES

INTEGRATION
BLEND IN OR STAND OUT

Adapt your building to its surroundings, or give it a completely different look.

INFORMATION
CLEAR MESSAGES

Clear information helps people to decide. Make it clear: who, what, where and why.

IDENTITY
A PERSONAL TOUCH

Accentuate your building – give it a unique personality

ILLUSION
AESTHETIC TRICKS

Things aren't always what they seem. Optical illusions provide a powerful way in which to highlight architectural expressions.

Steni Vision is easy to maintain and quick to install, with minimal waste. The panels are environmentally friendly, and thanks to the lifetime warranty of 60 years the total life-cycle cost is the lowest in their class.

WANT A PARTICULAR PATTERN?

Specific formats and requirements apply. Get in touch with your local sales rep for more information and assistance.

ONE WALL = ONE DESIGN

A single image can be divided up to cover all or part of the façade!

DIGITAL PRINTING

Steni Vision has a surface that is produced using digital printing technology. This gives you, as a designer, a unique opportunity to create an individual look in an easy, modern manner.

Stocked: F, M

Steni Nature stocked formats:
1,195 × 2,995 mm.
Full production width of 1195 mm is always charged.

STENI STANDARD FASTENERS (acid-resistant A4)

Product	Dimensions	No. per pack
Wood screw*	4.8 × 28/33 mm	500 pcs
Metal screw (self-drilling)	4.8 × 25 mm	500 pcs

We estimate 15 screws per m². The formula for calculation is: number of m² x 15 / 500 (one pack contains 500 screws).
The screws are supplied with a pan, T20 head (see page 23 for a complete overview).
*   Stocked with untreated heads, and with painted heads in stock panel colours.

BATCHES

Colour differences may occur between different production so consider this when you order panels.

HIGH FIRE CLASS

Steni Nature Coarse has A2-s1.d0 fire classification (ref our technical datasheet).

Steni Nature is easy to maintain and quick to install, with minimal waste. The panels are environmentally friendly, and thanks to their expected lifetime of over 60 years the total life-cycle cost is the lowest in their class.

Steni Nature is a fibreglass-reinforced stone composite panel suitable for use as external cladding on all types of buildings. The panels should be installed in accordance with our installation instructions.

Steni Nature is available in a multitude of surfaces, stone grades and formats. The panels blend in with the natural environment, making the timeless design an excellent alternative to plaster or brick.

STENI NATURE

With Steni Nature, you can choose from 14 different stone types, in four different gradings, as well as two types of recycled glass.

Screw and joint colors are specified in NCS S (Second Edition) color codes, abbreviated as "S" followed by the color code.

Choose Steni Nature in the standard size of 1195x2995 mm if you wish to do the cutting/drilling of the façade panels on-site.

Choose for customized lengths and widths, as well as pre-drilled panels, to minimize waste and time at the construction site.

We offer all widths between 196 mm and 1195 mm, and all lengths between 850 mm and 3495 mm. The maximum size is 1195x3495 mm.

The full production width of 1195 mm is always charged.

For a complete overview of available options, see the table on page 27.

CAN'T FIND WHAT YOU'RE LOOKING FOR?

Steni Nature can be ordered with special stone or in a special grade. In that case, our laboratory must approve the type of stone in advance and ensure that the grade chosen is suitable for production. This will result in a unique production run that will give your façade the unique and robust look that you want. Our standards of quality and precision are just as stringent for special orders as they are for our standard colours, but we cannot guarantee that the same type of stone will be available in the future. Please take this into consideration when calculating the size of your order.

STENI PROTEGO

Protego is a robust and weather-resistant roof panel.
The roof panel is made of stone composite and is supplied
with a smooth or rough surface.

- 40-year functional warranty and > 60-year expected product life.
- Frost resistant.
- Low weight, quick installation, the roof plate can be walked on.
- Suitable for adaptation to integrated "invisible" solar cells.

STANDARD SURFACES ◯ The samples indicated with a white dot have a light core colour as standard. ⬤ The samples indicated with a gray dot have a dark core colour as standard.
SN 8002 HM
NCS S 1000-N ◯

SN 8008 HM
NCS S 8000-N ⬤
SN 8900 M-HM
NCS S 9000-N ⬤

SN 305 SAND
NCS S 9000-N

Other colours and surfaces can be project customized.

FORMAT

595 x 595 (The number of panels must be divisible by 4).
1195 x 1195

For straight or diagonal mounting.

SOLAR CELLS

- Adapted to the format for integrated solar cells
- Roof tiles that are adapted to solar cells are normally coloured.
- Steni Protego roof tiles and solar cells can be installed continuously
side by side in the same installation process.

Feel free to contact us for further information.

DRILLING

Steni protego roof panels come pre-drilled.

ACCESSORIES

Protego Wood Screw A2
w/washer, 4,8x50 mm
Screws are supplied in
the same colour as the
panels.
Sold in boxes of 250
pieces.

Protego Ribbed shank
copper nail, 2,8x40 mm.
Sold in boxes of 1000
pieces.

terra by STENI® 25Y

A robust and natural foundation panel with a surface of crushed natural stone.

STANDARD SURFACES IN STOCK

Can be painted in other colours upon request.

Steni Vision - The Arctic Salmon Center

DO YOU WANT TO ADHERE YOUR FACADE WITH ADHESIVE?

Our partners have tested and approved adhesive systems adapted to our Steni Colour facade panel. The products must be purchased directly from the distributors. Installation instructions for approved adhesive systems can be downloaded by scanning the QR code on the right side.

Installation instructions:
Scan the QR code or visit steni.com

FORMATS AND DRILLING

ABOUT THE FORMAT TABLES

The panels are produced as a continuous sheet that is initially cut into lengths of 850–3,495 mm. These full-width panels are then divided in accordance with the widths stated in the format tables. Therefore, each full-width panel can only be divided into smaller panels of the same length. (see diagram).

Smaller formats under 196x850 can be ordered on request and are usually delivered in full width, which must be adjusted on-site. These panels come with a drawing showing how they should be cut with minimal waste.

An optimal production requires that the number of split panels always adds up to the full-width panel produced. Unfortunately, in some cases parts of the full-width panel cannot be used. There are three things in particular that will affect this.

- Choice of width format
- Variation in length format
- Splitting up the order

Steni is committed to supplying sustainable solutions that make better use of our resources and reduce the strain on the environment. By discussing your project with us at an early stage, you as a customer can help us in this important work and also help to reduce your project costs.

Length cut.
Splitting full-width panel (here 4 × 295 mm): see the panel division column in the tables below for possible configurations.
All panels split from the same full-width panel will always be of the same length.

PRODUCTION FORMATS STENI COLOUR

Steni Colour Standard and Stocked Format: 1195 x 2995 mm

We deliver all widths between 196 mm and 1195 mm, and all lengths between 850 mm and 3495 mm.
The full production width of 1195 mm will be charged for custom formats and is available at an additional cost.

Other formats are available upon request.
Offcuts smaller than 150 mm will not be included in the order.
Formats can be pre-drilled according to the standard drilling pattern (see QR code on page 27).

STANDARD PANEL FORMATS[W*L]		RECOMMENDED WIDTH ADJUSTMENT
1195	2995	295 + 295 + 295 + 295
		395 + 395 + 395
CUSTOM FORMATS [W*L]		595 + 295 + 295
		595 + 595
196-1195	850-3495	795 + 395
		895 + 295
		1195

The recommended widths in the table to the left will contribute to sustainable solutions for our customers with minimal waste and scrap on the construction site. For this to work efficiently, all the net panels within the same gross panel must have the same length (see figure).

PRODUCTION FORMATS STENI NATURE

Steni Nature Standard and Stocked Format: 1195 x 2995 mm

We deliver all widths between 196 mm and 1195 mm, and all lengths between 850 mm and 3495 mm.
The full production width of 1195 mm will be charged for custom formats and is available at an additional cost.

Other formats are available upon request.
Offcuts smaller than 150 mm will not be included in the order.
Formats can be pre-drilled according to the standard drilling pattern (see QR code on page 27).

STANDARD PANEL FORMATS [W*L]		RECOMMENDED WIDTH ADJUSTMENT
1195	2995	295 + 295 + 295 + 295
		395 + 395 + 395
CUSTOM FORMATS [W*L]		595 + 295 + 295
		595 + 595
196-1195	850-3495	795 + 395
		895 + 295
		1195

The recommended widths in the table to the left will contribute to sustainable solutions for our customers with minimal waste and scrap on the construction site. For this to work efficiently, all the net panels within the same gross panel must have the same length (see figure).

PRODUCTION FORMATS STENI VISION

Steni Vision is not stocked.
The full production width of 1195 mm will be charged for custom formats and is available at an additional cost.
Formats can be pre-drilled according to the standard drilling pattern (see QR code).

STANDARD PANEL FORMATS [W*L]		RECOMMENDED WIDTH ADJUSTMENT
1195	2995	295 + 295 + 295 + 295
		395 + 395 + 395
CUSTOM FORMATS [W*L]		595 + 295 + 295
		595 + 595
1195-1213	850-3190	795 + 395
		895 + 295
		1195

The recommended widths in the table to the left will contribute to sustainable solutions for our customers with minimal waste and scrap on the construction site. For this to work efficiently, all the net panels within the same gross panel must have the same length (see figure).

Download our standard drilling templates.
Scan the QR code or visit steni.com

PRE-DRILLING PANELS
Pre-drilling follows our standard drilling templates (see our website).

STENI COLOUR AND STENI VISION DESIGN ELEMENTS

Steni Vision design elements here refer only to standard print designs.
All items are delivered undrilled.
NB: All dimensions are internal dimensions.

L-ELEMENT

αAB [°]	A [mm]	B [mm]	A+B [mm]	Lenght [mm]
70 - 150	60 - 1192	60 - 1192	120 - 700	100 - 3495*
			701 - 800	100 - 3000
			801 - 1000	100 - 2400
			1001 - 1250	100 - 2000
			1251-1600	100 - 1500

* The maximum length of Steni Vision elements is 3190 mm
  The maximum length of non-90° elements is 3300 mm
Total price for elements = Production cost per. lm. [min. price 1 meter] + panel price per m2.

U-ELEMENT

αAD [°]	αCD [°]	A [mm]	D [mm]	C [mm]	A+D+C [mm]	Length [mm]
90 - 150	90 - 150	60 - 592	100 - 1187	60 - 592	220 - 700	100 - 3495*
					701 - 800	100 - 3000
					801 - 1000	100 - 2400
					1001 - 1250	100 - 2000
					1251 - 1600	100 - 1500

* The maximum length of Steni Vision elements is 3190 mm
Total price for elements = Production cost per. lm. [min. price 1 meter] + panel price per m2.
Please remember that elements will be described as follows in order confirmation:

For L-elements: Wing A / Wing B x Length A / Length B - Angle
For U-elements: Wing A / Base D / Wing C / Length / Angle AD / Angle CD

To avoid any misunderstandings, please specify element dimensions in your purchase order the same way as above.

STENI NATURE DESIGN ELEMENTS

Steni Nature design elements provide smooth, even corners.
All items are delivered undrilled.
NB: All dimensions are internal dimensions.

L-ELEMENT α = 90°

| A [mm]	B [mm]	A+B [mm]	Length fine [mm]	Length medium [mm]	Length coarse [mm]

ADVICE FOR PURCHASERS

BUY STENI
Steni only sells through building material dealers. If you are a private individual, you should contact your local supplier of building materials. If you are working on major projects requiring more follow-up, please contact one of our sales teams directly or scan the QR code below.

STOCK ITEMS
If you order one of our stock items, your order will normally be shipped within two weeks.

WHAT YOU GET
All our products are delivered on pallets, securely packed with protective plastic and straps. Each pallet is labelled with product and order numbers. Each pallet has a packing list providing information about its contents and brief instructions about storage and handling on site, as well as the necessary acceptance inspection.
There will also be information about where you can download installation instructions in your language.
Please remember that you will need to have a forklift truck available to unload the delivery at the construction site. If you do not have a forklift truck, a lorry crane will have to be ordered.

WHAT TO CONSIDER
Firstly, as a customer, you must decide which products you want and what you want the façade to look like. The formats, colours and composition you choose have a great bearing on the result in terms of both appearance and total cost. If you cannot use our standard formats, we recommend that you contact your local sales representative, who will be able to help you so that together we can find the best solution for your project.

During this process, we will also consider the choice of colour and gloss level, how on-site logistics will be handled, and various other aspects that you as a customer will have to decide on when you purchase custom formats from us. A phone call to us at an early stage can save you a lot of work, time and cost later in the process.

You should order via your local supplier of construction products or through one of our sales teams. We will be happy to help you to set up your order and thereby ensure that we understand your needs. For more information, refer to our sales and delivery terms.

STENI AROUND THE WORLD

Developing and manufacturing high-quality façades in Larvik, Norway since 1965.

Our products have been developed in the most demanding climate, and every day all over the world our façade panels are tested against the wind and weather, sun and rain and temperature fluctuations.

We have developed our products based on decades of experience and feedback, and today we can offer façade panels with a number of unique product advantages and a 60-year functional warranty.

Steni panels are both eco-friendly and pollution-resistant. Robust yet lightweight. Fireproof and frost-resistant. They keep their colour, and moisture just runs off. We call this Steni quality.

Today, we have sales companies and distributors throughout Europe, North America and the Middle East, and Steni façade panels protect and adorn buildings all over the world.
