Endless Possibilities - One Table Project

Within this catalogue you will discover a collection of highly customisable pieces, built specifically for the contract market and priced to suit commercial projects.

Each component can be finished in a broad choice of colours and treatments - powder coat, titanium plating (PVD), or a combination of the two - giving you complete freedom to tailor every piece to your project.

Base plates are available to support tops up to 100cm in diameter, with column heights specified to suit your requirements.

For the table tops, select from our comprehensive range of 12mm sintered stone, combining durability and elegance in one seamless solution.

PVD Finishes

Polished + brushed

*Physical Vapor Deposition (PVD) is a plating process where titanium is vaporized in a vacuum and deposited onto a substrate - In this case a stainless-steel base or frame, creating a thin but uniform and incredibly durable finish, resistant to wear, and corrosion. PVD is a clean process that doesn't involve hazardous chemicals, reducing environmental impact compared to traditional plating methods.

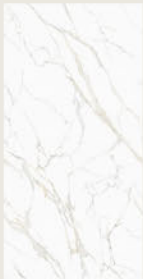

The above colours serve as a guide as to what is possible.
If you have a particular colour matching requirement please get in touch.
