

Hawkins Schools Programme

Hawkins Construction

Carpentry across seven new school builds

Over a four-year period, Hawkins delivered new school facilities at Haeata Community Campus, Rolleston High School, Papanui High School, Ashburton College, Allenton Primary, Ashburton Intermediate and Banks Avenue School. Farrell Construction was engaged throughout to provide specialist carpentry support.

With an average of 50+ staff across sites, our team supplied foremen and trade-qualified carpenters to deliver the full range of carpentry and builder's work packages. Farrell's ability to consistently resource and coordinate multiple large-scale projects was a key factor in our selection, ensuring progress and quality were maintained across the programme.

The result was seven education projects delivered to programme and specification in partnership with Hawkins.
