

Pak 'n Save Rolleston

Naylor Love

Large and fast-track interior fit-out delivery under a high-pressure construction programme

Scope

Pak 'n Save Rolleston is a fast-track supermarket development delivering a large-format retail store designed to support the rapidly growing Selwyn District. The project required efficient coordination, tight sequencing, and a strong focus on programme to achieve critical opening milestones.

Process

Our role as carpentry subcontractor included the delivery of internal and external framing and finishing carpentry across the store. The works were delivered within a highly compressed programme, requiring disciplined planning, rapid mobilisation, and close coordination with all trades on site. We also provided a dedicated Site Manager to oversee day-to-day delivery, manage trade interfaces, and ensure programme adherence in a fast-paced construction environment. This leadership support was critical in maintaining momentum and resolving issues quickly to protect the tight delivery schedule. Working within very tight timeframes, our team focused on productivity, sequencing, and quality assurance to ensure a smooth handover of a high-profile retail asset.

Solution

Our involvement at Pak 'n Save Rolleston demonstrates our capability to deliver fast-track retail projects, supported by strong site leadership and the ability to perform under significant programme pressure.
