

Hillmorton Hospital Acute Adult Facility

Naylor Love

Specialist healthcare fit-out delivered with precision, safety, and programme certainty in a live specialised mental health hospital environment

Scope

The Acute Adult Facility at Hillmorton Hospital is a specialised mental health development designed to provide modern, secure, and therapeutic environments for patient care. The project places a strong emphasis on safety, durability, and high-quality finishes suited to a sensitive healthcare setting.

Process

Our role as carpentry subcontractor includes the delivery of internal and external framing, external cladding and finishing carpentry throughout the facility. The project incorporates a modular pod system, requiring precise set-out, coordination, and integration within the wider structure, all delivered within tight timeframes. We are also providing a dedicated Site Manager to support day-to-day coordination, ensuring alignment between trades, maintaining programme, and upholding health and safety requirements, our team carefully manages access and staging to ensure continuity of programme operations.

Solution

Our involvement demonstrates our capability to deliver carpentry and fit-out works within complex healthcare environments, combining modern construction methods with strong site leadership, and a focus on safety, quality, and programme certainty.
