MRO services

CMI Defence LLC delivers Maintenance, Repair and Overhaul (MRO) services to customers at each standard level of maintenance for Armored vehicle Systems and more especially for John Cockerill Defence Systems.

CMI Defence complies with Military MRO standards and delivers high-class MRO services to or in collaboration with Armed Forces in their facilities or in CMI Defence facilities. Level of service provided to customer relates to customer’s requirements.

Fleet & Infrastructure Management

On request of the customer, CMI Defence can manage fully or partially the maintenance of the fleet and the infrastructure in order to maintain and guaranty a specified level of availability.

A Subsidiary of John Cockerill Defence

Spare Parts and Logistic Services

CMI Defence delivers the complete set of logistic services :

- Sale of spare parts based on catalogs or lists defined according to the users' needs
- Proposal of spare parts kit according to a usage profile and the customer's intervention capacities
- Logistic flow (transport and administrative documents)
- Storage
- Diagnosis and repair
- Configuration management
- Obsolescence management

Since Its establishment in December 2014, CMI Defence story has been one of growth. We have moved from providing services to John Cockerill Defense, our mother company, to a fully end-to-end MRO (Maintenance Repair and Overhaul) and Training service provider to the Saudi Armed Forces and Defense Industry. Today, the company ambitions are to be an important MRO player in the Saudi Defense market and is proud to participate in VISION 2030 by localizing defense activities in the kingdom.
