

THE PRODUCT

- **Copsol** is a copper nutrition deficiency corrector for all crops. It can be used in a preventive program or at the onset of symptoms.

DIRECTIONS FOR USE

- Product should be used during ideal growing conditions to ensure effective uptake. Avoid extreme weather conditions such as heat and frost events. Spraying in the early morning or late afternoon can assist in minimising risk of rapid drying on the leaf due to evaporation. Where local experience of successful use is not available, we recommend a small scale jar test and test application prior to wide spread use. If any issues are observed do not continue with the application.
- It is recommended to add product to the tank mix after all other products have been mixed well in the tank, including most of the water.
- Do not apply by foliar application to stone fruit.
- Do not apply by foliar application to flowers or fruit of any crop.

COMPATIBILITY

Compatible with most common fertilisers and crop protection products. It is recommended to perform a jar test before mixing. Do not use with amine based products. Do not apply **Copsol** with copper fungicides by foliar application on all crops.

SAFETY DATA SHEET

For further information, refer to the Safety Data Sheet (SDS) which is available from the supplier or from our web site, www.sipcam.com.au

G.H.S STATEMENTS - Warning

Hazard statements

H302 - Harmful if swallowed

H315 - Causes skin irritation

H319 - Causes serious eye irritation

H410 - Very toxic to aquatic life with long lasting effects

Precautionary Statements - Prevention

Wash face, hands and any exposed skin thoroughly after handling

Do not eat, drink or smoke when using this product

Do not breathe fume, gas, mist, vapours, spray

Avoid release to the environment

Wear protective gloves / protective clothing / eye protection / face protection

Precautionary Statements - Response

Specific treatment (see First aid on this SDS)

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing

If eye irritation persists: Get medical advice/attention

IF ON SKIN: Wash with plenty of soap and water

If skin irritation occurs: Get medical advice/attention

Take off contaminated clothing and wash before reuse

IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell.

Rinse mouth. Collect spillage.

Precautionary Statements - Disposal

Dispose of contents/container in accordance with local, regional, national, and international regulations as applicable

Copsol

NUTRITIONAL PLANT SULFATE FORMULATION

High sulfate analysis copper formulation

Total copper (Cu) content of 67g/L

Total sulphate (S) content of 34g/L

Formulation: A copper sulfate liquid designed for furrow injection, foliar and fertigation applications where a high analysis and minimal compatibility is required to prevent or correct a nutrient deficiency.

CROPS	RATE	COMMENTS
BROADACRE CROPS	Foliar 0.5 – 2 L/ha Furrow Injection 2 – 4 L/ha Soil Drench 5 – 10 L/ha	Apply Cereals 3-5 leaf stage. Pulses/Lucerne 10-14 days before flower Canola 4-9 true leaves Furrow Injection apply 2cm below seed depth Soil Drench apply pre-seeding
TREES (excluding stonefruit), NUTS, BERRIES AND VINES	Fertigation 2 – 5 L/ha	Apply at regular intervals of 7-14 days from petal fall up until harvest
VEGETABLES Cucurbits, Fruiting Vegetables, Potatoes, Carrots, Onions	Foliar & Fertigation 500mL – 1 L/ha	Apply from onset of active growth

CAUTION: Do not apply as a foliar application in conjunction with copper and EC fungicides. Applications in adverse spraying conditions or in conjunctions with some crop protection products may result in reductions in efficacy or phytotoxicity which may not be acceptable to growers. For most effective results apply early morning or late afternoon.
