

### THE PRODUCT

- **Amino Boss Calcium** is a calcium nutrition deficiency corrector for all crops. It can be used in a preventive program or at the onset of symptoms.

### DIRECTIONS FOR USE

- Product should be used during ideal growing conditions to ensure effective uptake. Avoid extreme weather conditions such as heat and frost events. Spraying in the early morning or late afternoon can assist in minimising risk of rapid drying on the leaf due to evaporation. Where local experience of successful use is not available, we recommend a small scale jar test and test application prior to wide spread use. If any issues are observed do not continue with the application.
- It is recommended to add product to the tank mix after all other products have been mixed well in the tank, including most of the water.
- Do not apply by foliar application to stone fruit.
- Do not apply by foliar application to flowers or fruit of any crop.

### COMPATIBILITY

Compatible with most common fertilisers and crop protection products. It is recommended to perform a jar test before mixing. Do not use with amine based products. Do not apply **Amino Boss Calcium** with copper fungicides by foliar application on all crops.

### SAFETY DATA SHEET

For further information, refer to the Safety Data Sheet (SDS) which is available from the supplier or from our web site, [www.sipcam.com.au](http://www.sipcam.com.au)

# Calcium

## PLANT ACTIVE CHELATE FORMULATION

### Highly available plant active Calcium formulation

Total calcium (Ca) content of 62g/L w/v as Amino Acid Chelate

Total nitrogen (N) content of 18g/L w/v

A unique formulation of calcium amino acid chelate solution containing the complete range of amino acids in conjunction with polyols to assist in chelation and plant performance. Recommended for foliar applications where a chelated product with excellent plant uptake and good compatibility is required.

**CAUTION:** Do not apply as a foliar application in conjunction with copper and EC fungicides. As **Amino Boss Calcium** contains a strong chelating agent, it will increase the activity of copper and levels of resulting phytotoxicity may not be acceptable to growers. For most effective results apply early morning or late afternoon.

This product is NOT a Dangerous Good under the Australian Code for the transport of Dangerous Goods by road and rail.

### WARNING STATEMENTS

Do not swallow. The spray from this product may act as an irritant. Avoid inhalation and contact with the eyes and skin.
