

Jint vs. LumApps

Discover why 500+ companies chose Jint, the 100% native Microsoft 365 solution. Get a modern intranet inside the M365 you already own, without a separate platform, parallel data hosting, or waiting on a vendor's roadmap.

Jint's Key Strengths

Deployment & Simplicity

Native Integration

Performance

Data Security

User Experience

Autonomy

Capability / Feature	Jint	LumApps
Intranet creation & implementation	Native and fast, reusing your existing Microsoft 365 skills. Live in weeks.	Powerful but complex; often needs a partner and a longer rollout.
Maintenance & data storage	Self-managed, with 100% of your data stored in your own Microsoft 365 tenant.	Separate platform to maintain; data on LumApps' SaaS, outside your tenant.
Microsoft 365 & Teams integration	Truly native to SharePoint, Teams and Viva. No connectors, no webviews.	Google Workspace origin; Microsoft 365 support added on top.
News & internal communication	Fully customizable, mobile-ready, and publishable by any business user.	Strong top-down comms, but limited content personalization on the user side.
Translation & multilingual	Instant automatic translation in 100+ languages for a global workforce.	Built-in multilingual support, with more manual version management.
Search & navigation	Unified search across all your Microsoft 365 content, with advanced targeting.	Search can feel slow or heavy on large pages, per user reviews.
Generative AI	Jint Genius assistants grounded in your governed M365 content.	Proprietary AI features running on a separate third-party platform.
Pricing & roadmap autonomy	Builds on the M365 you already pay for; auto-updated, no upgrade project.	Pricing not public; features wait on the vendor roadmap, with long delays.

Why Choose Jint

✓ Launch faster with ultra-light training and empower users with less IT dependency.

✓ Deliver a seamless experience across all Microsoft environments, faster and reliably.

✓ Create beautiful, targeted communications, without design constraints.

✓ Engage global teams by instantly delivering content in their native language.

✓ Keep your data secure with full sovereignty inside your Microsoft tenant.

✓ Strengthen company culture with engaging, automated tools.

✓ Help employees find what they need with unified, intuitive search and AI assistants.

✓ Stay in control of your brand and mobile experience with a self-service builder.
