Microsoft 365 integration

Foundation

Data, hosting & sovereignty

Design & customization

Multi-channel reach

Custom modules & technical debt

Generative AI

Pricing

Jint

Native add-in to SharePoint, Teams and Viva.

Built natively on your Microsoft 365 and SharePoint.

100% in your own M365 tenant, with the French Bleu trusted-cloud option.

Full SharePoint flexibility, configured in self-service.

Jint Mobile (PWA) with targeted push for frontline teams.

Auto-updated by Microsoft and the editor, no bespoke code to maintain.

Jint Genius assistants grounded in your governed M365 content.

Builds on the Microsoft 365 you already pay for.

Intranet Inside

Standalone platform; connects to Teams and Outlook via connectors and APIs.

A separate platform, delivered project-by-project like an agency.

Hosted in a French ISO 27001 data center, but outside your tenant.

Highly customizable, modular design, a real strength.

Reaches teams across desktop, mobile, TV screens, email and SMS, a strong point.

Bespoke modules sit outside the common base and must be maintained over time.

Connectors (such as DeepL) but no native Microsoft 365 AI layer.

Quote-based project pricing, on top of your M365 licenses.

Why Choose Jint

✓ Launch faster with ultra-light training and empower users with less IT dependency.

✓ Deliver a seamless experience across all Microsoft environments, faster and reliably.

✓ Create beautiful, targeted communications, without design constraints.

✓ Engage global teams by instantly delivering content in their native language.

✓ Keep your data secure with full sovereignty inside your Microsoft tenant.

✓ Strengthen company culture with engaging, automated tools.

✓ Help employees find what they need with unified, intuitive search and AI assistants.

✓ Stay in control of your brand and mobile experience with a self-service builder.
