

# Ready for the New HQWBL Reporting Standards?

**Virginia CTE Directors** are facing another major shift in state reporting requirements, and the administrative burden is only growing. While college and career readiness platforms like SchoolLinks™ and MajorClarity™ support student engagement, they have not aligned with VDOE's work-based learning compliance tasks and reporting needs.

**The result:** CTE teams are still chasing paper training agreements, tracking hours in spreadsheets, and struggling to keep employers engaged. With the **2026-2027 school year approaching**, districts need a faster, cleaner way to meet VDOE expectations.

## A Smarter Way to Manage Reporting

CTEWorkforce streamlines the entire HQWBL process by complementing your existing systems and eliminating manual uploads. Our platform automates the documentation, verification, and reporting required for CTERS, removing the bottlenecks that slow districts down.

### Our Solution Helps You:

- **Deliver Audit-Ready Data:** Access precise, verified information formatted for seamless CTERS submission.
- **Eliminate Spreadsheet Fatigue:** Digitize all documentation required for Virginia's 3E Readiness Framework.
- **Track Hours in Real Time:** Use automated hour verification preformatted for CTERS uploads.
- **Frees Your Time:** Shift your focus away from paperwork and back to program design, budgeting, and curriculum development.
