

Simplify the Tracking and Reporting of WBL Programs

United States
Department
of Education

CTEWorkforce bridges the gap between the classroom and the workplace to help build tomorrow's future workforce. Our **secure, cloud-based platform** automates the **management of Career and Technical Education** and **Work-Based Learning (WBL)** tracking to deliver compliant and scalable career readiness programs.

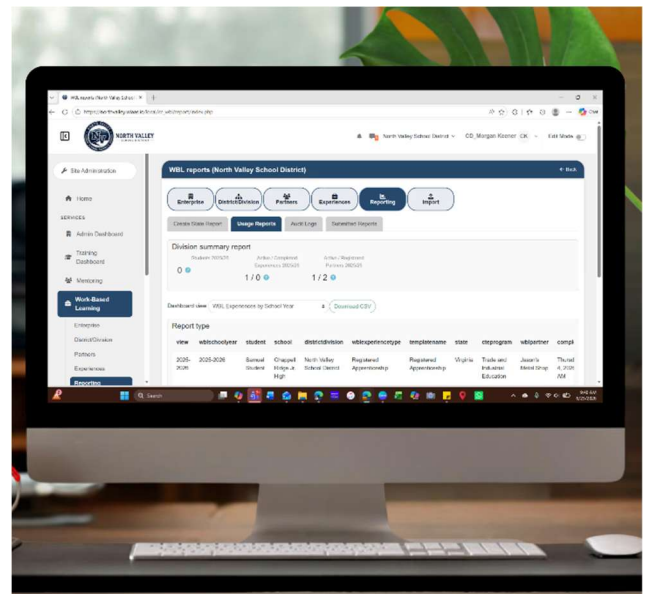

A complete solution that is configured to match your state's specific requirements. Our solution effortlessly **aggregates and exports** the precise data metrics required for federal accountability and funding, while working side-by-side with other existing software solutions.

Automate Your WBL Programs

CTEWorkforce streamlines the entire process by **complementing your existing systems** and eliminating manual uploads. Our platform automates the documentation, verification, and **reporting required** for your state standards, removing the bottlenecks that slow districts down.

Our Solution Helps You:

- **Automated Approval Workflows:** Execute initial program approvals and capture continuous employer feedback.
- **Automated Certification Tracking:** Measure student progress and issues competition certificates instantly.
- **Automated Experience Reporting:** Generate and submit required data directly to the state oversight organization.
- **Maximize Staff Capacity:** Multiple users can be assigned to input student experience data simultaneously.
