

THE POWER OF CHOICE

COREnergy is part of Vivant Energy, under the Vivant Corporation

Vivant is a proudly Filipino, family-owned business that has grown with the times while staying true to its roots.

From its early ventures to today, Vivant has always focused on finding better ways to serve the needs of people, businesses, communities, and the nation. That same drive fuels COREnergy, helping businesses power their profitability, productivity, and performance.

Our Journey in Energy

1918: Starting the Journey

Vivant's roots in energy go back to the early 1900s, when the family behind the company expanded from shipping and trade into electricity by taking on the operations of Visayan Electric Company (VECO).

1945: Growing VECO

VECO grew steadily to become the country's second largest privately owned distribution utility. Vivant remains a proud co-owner with a significant stake in VECO's operations.

2003: Vivant is Born

The family consolidated its energy holdings under Vivant Corporation, a listed company in the Philippine Stock Exchange. From then on, Vivant became the name behind the group's growing energy businesses.

2005: From Distribution to Generation

As the Philippines' power demand grew, Vivant moved into power generation. It invested in Cebu Private Power Corporation and later Cebu Energy Development Corporation, strengthening the country's power supply.

2007: Going Off-Grid

Vivant recognized the need for dependable power beyond the main grid, leading to its first off-grid project, Delta P in Palawan. Today, it's the country's largest off-grid investor, bringing electricity to underserved communities.

2009: Scaling Renewables

With rising demand for clean energy, Vivant Energy acquired hydropower plants and invested in renewable and hybrid solutions, proving reliability and sustainability can go hand in hand.

2016: COREnergy is Born

The launch of Retail Competition and Open Access paved the way for COREnergy, Vivant's licensed retail electricity supplier. COREnergy was created to give businesses flexible, affordable, and reliable energy options—helping them cut costs and grow.

2019: Venturing into Water

Vivant expanded into water through Vivant Water, tackling bulk supply, wastewater treatment, and distribution. Projects include the country's first large-scale desalination plant, Isla Mactan Cordova Corp.

2019: Activating Vivant Energy

Vivant Energy was fully activated to oversee the group's portfolio in generation, distribution, retail electricity, and engineering solutions across Luzon, Visayas, and Mindanao.

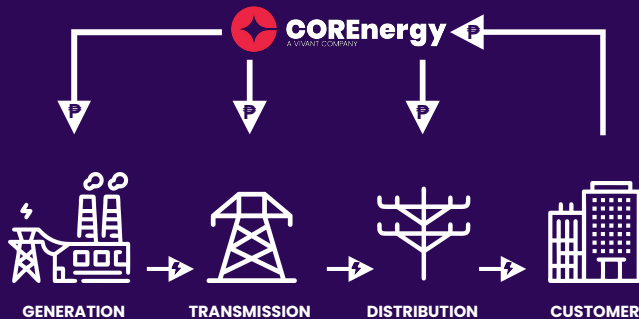

2024: Expanding Retail

With new generation projects coming online, COREnergy continues to grow its reach. More businesses now have access to affordable, flexible energy deals, giving them greater control over their power and their future.

What is Retail Energy?

Retail energy gives businesses the freedom to choose where their electricity comes from. Thanks to the Retail Competition and Open Access (RCOA) under the Electric Power Industry Reform Act of 2001, licensed Retail Electricity Suppliers (RES) can now source power from different generators and deliver it to customers.

The electricity still flows through the same lines, but the big difference is choice. Instead of being locked into a single utility, businesses can now find an energy partner, such as COREnergy, that can give them more flexible, often more affordable, energy solutions that fit their needs.

By streamlining how we work with power generators, we keep generation costs down. This allows COREnergy to give customers reliable service at competitive prices.

Is my business eligible?

NEW lower eligibility threshold: 100kW

Businesses with an **average electricity demand of at least 100 kW** will be eligible to choose their own Retail Electricity Supplier (RES) **by June 2026**, opening retail energy access to more businesses than ever.

Don't meet the threshold with just one site? You can still qualify by combining the electricity use of multiple branches or facilities in the same area through the **Retail Aggregation Program (RAP)**.

If you're unsure whether you qualify, talk to us. We'll help you figure it out and walk you through your options so you can make the most of your power.

Why choose COREnergy?

Because we put the power in your hands.

Competitive rates
and no hidden charges to help you save on electricity costs

Flexible energy plans
designed around your business needs

Expert support
who respond quickly so you can run things smoothly

Daily usage data
so you can spot inefficiencies and boost performance

The COREnergy Offering

Energy Plans

We give you the freedom to choose. Our electricity contracts are designed to help you save on costs while tailoring your tariffs to fit your industry or your unique business needs.

Fixed & Flat

Secure a flat rate across all hours, days, and months of your contract.

Day Night Plan (Time-of-Use)

Get different rates for peak and off-peak.

*Peak: 10am-10pm
Off-peak: 10pm-10am*

Sunshine Plan (Solar + WESM Plus)

Enjoy a flat rate for Solar hours; variable price for Non-solar.

*Solar: 8am-5pm
Non-solar: 5pm-8am*

WESM Plus

Enjoy variable price based on spot market.

Custom Rate

Work with us to develop a tailor-fit energy plan uniquely suitable to your needs.

Energy Services

From audits and maintenance to tracking, our energy services keep your facilities running safely, efficiently, and with less waste.

We're happy to help you decide on the best tariff and services package for you!
