

THE POWER OF CHOICE

**Powering your profitability,
productivity, and performance.**

Backed By Over A Century Of Philippine Energy Heritage

COREnergy is part of **Vivant Energy**, under the **Vivant Corporation**—a proudly Filipino, family-owned institution with a history of service dating back to 1918. From pioneer power distribution in the Visayas to leading off-grid and renewable projects nationwide, Vivant's commitment fuels COREnergy today, helping businesses optimize their energy strategies.

1918: Starting the Journey

Vivant's roots in energy go back to the early 1900s, when the family behind the company expanded from shipping and trade into electricity by taking on the operations of Visayan Electric Company (VECO).

1945: Growing VECO

VECO grew steadily to become the country's second largest privately owned distribution utility. Vivant remains a proud co-owner with a significant stake in VECO's operations.

2003: Vivant is Born

The family consolidated its energy holdings under Vivant Corporation, a listed company in the Philippine Stock Exchange. From then on, Vivant became the name behind the group's growing energy businesses.

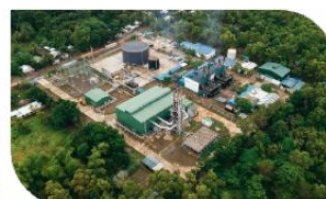

2005: From Distribution to Generation

As the Philippines' power demand grew, Vivant moved into power generation. It invested in Cebu Private Power Corporation and later Cebu Energy Development Corporation, strengthening the country's power supply.

2007: Going Off-Grid

Vivant recognized the need for dependable power beyond the main grid, leading to its first off-grid project, Delta P in Palawan. Today, it's the country's largest off-grid investor, bringing electricity to underserved communities.

2009: Scaling Renewables

With rising demand for clean energy, Vivant Energy acquired hydropower plants and invested in renewable and hybrid solutions, proving reliability and sustainability can go hand in hand.

2016: COREnergy is Born

The launch of Retail Competition and Open Access paved the way for COREnergy, Vivant's licensed retail electricity supplier. COREnergy was created to give businesses flexible, affordable, and reliable energy options—helping them cut costs and grow.

2019: Venturing into Water

Vivant expanded into water through Vivant Water, tackling bulk supply, wastewater treatment, and distribution. Projects include the country's first large-scale desalination plant, Isla Mactan Cordova Corp.

2019: Activating Vivant Energy

Vivant Energy was fully activated to oversee the group's portfolio in generation, distribution, retail electricity, and engineering solutions across Luzon, Visayas, and Mindanao.

2024: Expanding Retail

With new generation projects coming online, COREnergy continues to grow its reach. More businesses now have access to affordable, flexible energy deals, giving them greater control over their power and their future.

What Is Retail Energy?

Retail energy gives you the freedom to choose your electricity source. Under the Retail Competition and Open Access (RCOA) law, qualified businesses are no longer locked into a single utility.

The electricity still flows through the same physical lines, but you can now partner with **COREnergy** to secure more flexible, cost-effective plans. By working directly with top power generators, we keep costs down and pass the savings on to you.

Why Choose COREnergy?

Reduce Costs: Save up to 15% on generation charges.

Protect Your Budget: Limit exposure to market price volatility.

Flexible Plans: Electricity contracts tailored to your specific enterprise.

Expert Care: End-to-end technical support at every step.

Daily Usage Data: Spot inefficiencies to boost performance.

Energy Plans

Freedom to choose

We design our electricity contracts to fit your operational schedule and budget requirements:

Fixed & Flat

Secure one flat rate across all hours, days, and months of your contract.

Day-Night (Time-of-Use)

Get lower rates for off-peak hours (10:00 PM – 10:00 AM) and optimized rates for peak hours.

Sunshine Plan (Solar + Spot Market)

Enjoy a flat rate during solar hours (8:00 AM – 5:00 PM) and variable rates for non-solar hours. optimized rates for peak hours.

WESM Plus

Secure a variable price tied directly to the spot market.

Custom Rate

Let us build a unique, tailor-fit plan for you.

MyPower Platform

Real-time visibility in your daily consumption data

Energy Services

Your Partner In Energy Management:

Practical solutions to manage costs, support compliance and address operational risk

Energy Audit

Comprehensive flow assessments to find wasteful consumption patterns, categorized by investment level (Preliminary, Investment Grade, and RA 11285 Compliance).

Safety Audit

In-depth inspections utilizing thermal imaging and short-circuit studies to prevent costly hazards.

Testing, Commissioning & Preventive Maintenance

Verifying new infrastructure and running scheduled preventative maintenance.

Energy Efficiency Transformation

End-to-end support for your energy infrastructure

Solar + BESS Turnkey Solutions

Future-proof your facility with high-yield solar arrays integrated with containerized battery storage.

Is My Business Eligible?

The threshold is now lower.

Any business with an average electricity demand of **at least 100 kW** can now choose its own supplier.

Multiple facilities? You can still qualify by combining the energy load of different branches in the same area through the **Retail Aggregation Program (RAP)**.
