

Story Types

A decorative border in a light pink color frames the central text. It consists of vertical lines on the left and right sides, and horizontal lines at the bottom. Small circles, resembling solder points or vias, are placed at various intervals along these lines. The lines and circles are interconnected, creating a complex, circuit-like pattern that surrounds the text.

Bridging the AI language gap in Africa and beyond

Kira Schacht

07/29/2023

AI tools, from ChatGPT to Google Translate, are useless to billions of people in the Global South who don't work in western languages. Researchers and startups from Africa and other parts of the world are changing that.

... but looking at them can also provide a dash of realism

AI chatbots lose money every time you use them. That is a problem.

The cost of operating the systems is so high that companies aren't deploying their best versions to the public
