

# FUTURETIME: INSECTS

## What we learned today:

We explored how insects have changed over millions of years—from giant dragonflies in the past to ants adapting to city life today! Next we imagined how insects might look and survive in the future, including what amazing adaptations they might have. Then students built our own Giant Insects of the future to display in a science museum!

## Quiz your family!

What is the main difference between insects and bugs?

- A) The number of legs they have
- B) The kind of mouth they have
- C) Whether they prefer playing video games or watching sports

## Ask your family

“What are some ways humans and insects might evolve to help each other in the future?”
